Field Guide to Succulents of Southern Africa Gideon Smith, 2017-08-11 Southern Africa is the natural home of the richest and most diverse succulent flora in the world. These plants come in all shapes and sizes, from trees such as the baobab at more than 20 m tall to miniature soil huggers just a few millimetres high which mimic their pebble desert surroundings. This user-friendly, richly illustrated field guide features more than 700 southern African succulents, focusing on the most interesting and commonly encountered species. An introduction to families and their key features will help readers identify the relevant plant group, while concise accounts describing the plants' diagnostic features, along with distribution maps, will enable quick ID of species. More than just an ID guide for plant lovers, this book will inspire gardeners who are turning to indigenous, low-maintenance, and waterwise plants for cultivation.

The Living Deserts of Southern Africa Barry Lovegrove, 2021-09-01 For generations the deserts of southern Africa have intrigued scientists and travellers alike. Seemingly barren wastes, they in fact teem with life, from ants to elephants, stone plants to the curious welwitschia, dainty dik-diks to towering gemsbok and cart-wheeling spiders, to fog-basking beetles. How do they cope with scarce resources, unpredictable rainfall, and extreme temperatures? How do they protect themselves against predators? And what is the impact of climate change on these life forms and their habitats? Drawing on an earlier edition published in 1993, biologist Barry Lovegrove answers these questions and unravels many of the mysteries associated with life in the desert. He describes the four arid biomes of South Africa: Namibia and Botswana Desert, Arid Savanna, Succulent Karoo, and Nama Karoo, and explains how and why such a great diversity of plants, insects, mammals, reptiles, and birds successfully exist in these
