elements are incorporated into Christian worship It incorporates research conducted in Los Angeles congregations Through extensive interviews in a sample of Protestant Catholic and Orthodox congregations it looks into the way visual elements actually become part of the experience of worship By looking at attitudes and experiences of beauty art and memories it suggests that believers appropriate images and aesthetic encounters in terms of imaginative structures that have been formed through worship practices over time By comparing responses across denominations the book proposes that people receive visual elements in ways that have been shaped by long traditions and specific background beliefs In addition to discussions of the differences between the major Christian traditions the book also examines the relation of art and beauty to worship the role of memories and everyday life and the power of images in spirituality and worship By its focus on the worshiper the book seeks to make a contribution to the growing conversation between the arts and Christian worship and to the process of worship renewal
