Outlines of Sociology Ludwig Gumplowicz, 2020-08-26 This book arouses discussion about the place of Ludwig Gumplowicz in the history of sociology It offers an overview of Gumplowicz main ideas in general particularly those expressed in his other major work *Der Rassenkampf* and an examination of the men and movements in sociology

Grundriss der soziologie Ludwig Gumplowicz, 1885 The Normative Structure of Sociology (RLE Social Theory) Hermann Strasser, 2014-08-13 In this provocative analysis of the central issues and developments in modern social theory Dr Strasser contends that enquiry into the function tasks and mission of sociology as a discipline can be understood only in relation to the subject s historical development He believes that a discussion of the origin and intention of sociology particularly in relation to the established social order enables us to grasp fully the nature of sociological theory both past and present He maintains that a sociologist s own position in society and consequently his views on its development and his way of expressing those views will affect the theoretical position he takes up *Talcott Parsons* Uta Gerhardt, 2002-10-10 Table of contents **Empirical social research in Weimar-Germany** Susanne Petra Schad, 2019-04-15 No detailed description available for Empirical social research in Weimar Germany The Social Theory of Georg Simmel Nicholas John Spykman, 1925 *Schlüsselwerke der Soziologie* Sven Papcke, Georg W. Jahrhunderts relevant sein k nnen **Rage and Denials** Branko Mitrović, 2015-08-13 In *Rage and Denials* philosopher and architectural historian Branko Mitrović examines in detail the historiography of art and architecture in the twentieth century with a focus on the debate between the understanding of society as a set of individuals and the understanding of individuals as mere manifestations of the collectives to which they belong The conflict between these two views constitutes a core methodological problem of the philosophy of history and was intensely debated by twentieth century art historians one of the few art historical debates with a wide range of implications for the entire field of the humanities Mitrović presents the most significant positions and arguments in this dispute as they

were articulated in the art and architectural historical discourse as well as in the wider context of the historiography and philosophy of history of the era He explores the philosophical content of scholarship engaged in these debates examining the authors positions the intricacies and implications of their arguments and the rise and dominance of collectivist art historiography after the 1890s He centers his study on the key art historical figures Erwin Panofsky Ernst Gombrich and Hans Sedlmayr while drawing attention to the writings of the less well known Vasiliy Pavlovich Zubov Rage and Denials offers a valuable window onto how key aspects of modern research in the humanities took shape over the course of the twentieth century

Emile Durkheim Steven Lukes,1985 This study of Durkheim seeks to help the reader to achieve a historical understanding of his ideas and to form critical judgments about their value To some extent these two aims are contradictory On the one hand one seeks to understand what did Durkheim really mean how did he see the world how did his ideas related to one another and how did they develop how did they related to their biographical and historical context how were they received what influence did they have and to what criticism were they subjected what was it like not to make certain distinctions not to see certain errors of fact or of logic not to know what has subsequently become known On the other hand one seeks to assess how valuable and how valid are the ideas to what fruitful insights and explanations do they lead how do they stand up to analysis and to the evidence what is their present value Yet it seems that it is only by inducing oneself not to see and only by seeing them that one can make a critical assessment The only solution is to pursue both aims seeing and not seeing simultaneously More particularly this book has the primary object of achieving that sympathetic understanding without which no adequate critical assessment is possible It is a study in intellectual history which is also intended as a contribution to sociological theory

A Socialist Realist History? Kristina Jõekalda,Krista Kodres,Michaela Marek,2019-06-17 How did the Eastern European and Soviet states write their respective histories of art and architecture during 1940s 1960s The articles address both the Stalinist period and the Khrushchev Thaw when the Marxist Leninist discourse on art history was invented and refined Although this discourse was inevitably Sovietized in a process dictated from Moscow a variety of distinct interpretations emerged from across the Soviet bloc in the light of local traditions cultural politics and decisions of individual authors Even if the new official discourse often left space open for national concerns it also gave rise to a countermovement in response to the aggressive ideologization of art and the preeminence assigned to Socialist Realist aesthetics

The Anthropological Turn in Literary Studies Jürgen Schläeager,1996

Russia's Plato Frances Nethercott,2019-07-31 This title was first published in 2000 This work identifies the differences between the Russian intellectual approach to reading Plato and that of other European countries This study offers a complex perspective on Russian philosophical learnings up to 1930 The book contains five chapters with the first aiming to provide the general institutional context in which Russian 19th century Plato scholarship developed caught as it were between the

rise of the historical sciences and the heavy hand of state interference in standardizing the educational system in the name of nation building and modernization The second chapter attempts to illustrate how Plato served as a reference in Russian philosophical culture and the third deals with aspects of Russian philosophy of law In the fourth chapter the author shifts his approach to compare and contrast a number of reactions to a single dialogue the Republic and in the final concluding chapter addresses the question of whether it is legitimate to speak of a Russian Platonism *The Social Sciences and Their*

Interrelations William F. Ogburn, Alexander Goldenweiser, 1927 *Durkheim's Sociology of Religion* WSF

Pickering, 2009-05-28 Religion is central to Durkheim's theory of society and his work laid most of the foundations of the sociology of religion Daring and brilliant though his analysis was its bold claims and questionable premises has made it the subject of ongoing academic debate Durkheim's work on the subject reached a peak with the publication in 1912 of what turned out to be a classic in its field *The Elementary Forms of the Religious Life* No other book has explained Durkheim's views on religion using the whole corpus of his writings Dr Pickering shows how Durkheim's position developed and explains the themes and theories that run through Durkheim's work This includes Durkheim's attitude towards secularisation and Christian churches as well as his notion of the contemporary cult of the individual *Sociology through Relation* Christian Papilloud, 2017-10-17 This book delivers a top down understanding of relation as a macro phenomenon in society This understanding rests on the reconstruction of an ongoing debate in the French tradition about the purpose of a relational perspective in sociology and the social sciences Christian Papilloud analyzes the cardinal steps of this debate which historically relate to the concept of solidarity expressing an ideal of social cohesion through relationships between personal and non personal actors In social theory it is well known that solidarity refers to Emile Durkheim But little is known about the controversies generated in relation to the purpose of a relational perspective in sociology Papilloud reconstructs and follows the most important of these controversies in a comparative perspective beginning with Emile Durkheim and Gaston Richard on solidarity Richard and Marcel Mauss on sacrifice and magic Mauss and Pierre Bourdieu on gift and social positions Bourdieu and Bruno Latour on the objects of exchanges and institutions and Latour and Durkheim on reciprocity and control These comparisons give shape to a theoretical framework for a sociology through relation *The Development of Durkheim's Social Realism* Robert Alun Jones, 1999-11-04 Drawing on the kind of historicist perspective encouraged by Quentin Skinner and Richard Rorty this book explores the development of Durkheim's social realism Durkheim argued that social facts should be studied as real concrete things but Professor Jones argues that his social realism was less a sociological method than a way of speaking and thinking about social phenomena through which Durkheim hoped to secure the allegiance of French citizens to the Third Republic Professor Jones's book based on many years research in this area takes advantage for the first time of newly discovered lecture notes from Durkheim's philosophy class of 1883-4 and explores the significance of German social science in Durkheim's thought *The Development of Durkheim's Social Realism* will be of

immense value to graduate students and scholars in sociology social theory social and political philosophy and history of ideas
