**Understanding Adoption** Kathleen Hushion, Susan B. Sherman, Diana Siskind, 2006 Adoption is a transformational process bringing parenthood to those who long for but cannot bear children and giving stranded children home family and their place in the world But every adoption is preceded and followed by its story and when these stories are told in the offices of psychotherapists we begin to understand the impact of adoption in all its complexity We learn from parents how their quest to have and raise a child has played out in real life and what shadows might have fallen between the dream and the reality And we learn from the children the many ways that being adopted shaped their development their sense of identity what went wrong along the way and how we may

help Clinical work with parents and children as well as with adults who were adopted is the focus of Understanding Adoption Because adoption has become widely practiced accepted and accessible and because it has greatly changed the composition of families it is a timely subject for study The authors of this book undertake exploration of this important terrain of loss and connection and of the fragility and resilience of human bonds **Handbook of Psychology, Developmental Psychology**

Irving B. Weiner, Richard M. Lerner, M. Ann Easterbrooks, Jayanthi Mistry, 2012-10-16 Psychology is of interest to academics from many fields as well as to the thousands of academic and clinical psychologists and general public who can't help but be interested in learning more about why humans think and behave as they do This award winning twelve volume reference covers every aspect of the ever fascinating discipline of psychology and represents the most current knowledge in the field This ten year revision now covers discoveries based in neuroscience clinical psychology's new interest in evidence based practice and mindfulness and new findings in social developmental and forensic psychology Handbook of Cultural

David M. Brodzinsky Associate Professor of Developmental and Clinical Psychology Rutgers University, Marshall D. Schechter Professor of Child and Adolescent Psychiatry University of Pennsylvania School of Medicine (Emeritus), 1990-04-12 In this volume David Brodzinsky who has conducted one of the nation's largest studies of adopted children and Marshall Schechter a noted child psychiatrist who has been involved with adoption related issues for over forty years have brought together a group of leading researchers from various disciplines to explore the complex interdisciplinary subject of adoption While recent empirical work has shown that adopted children are more vulnerable to a host of psychological and school related problems compared to their nonadopted peers and that the rate

of referral of adopted children to mental health facilities is far above what would be expected given their representation in the general population our understanding of the basis for these problems remains unclear In this book theoretical empirical clinical and social policy issues offer new insights into the problems facing parents of adopted children and especially the children themselves A comprehensive study The Psychology of Adoption will be of interest to child psychiatrists developmental and clinical psychologists social workers social service providers and adoptive parents
