Kenya County Nys Recruitment 2014:

Youth Employment Programmes in Africa Ramos E. Mabugu, Lucas Ronconi, 2025-10-03 This book investigates youth employment programmes across nine African countries providing important insights into the world's youngest continent by population in which 60% of people are aged under 25. By 2050 the labour force in sub-Saharan Africa is expected to be almost double the size of the labour force in high income countries representing a massive shift in the world's working population and providing a significant challenge for job creation. In this book contributors bring together insights from more than 500 in depth interviews and 1 500 focus group participants to consider whether youth employment programmes are effectively reaching vulnerable groups. This book tackles the problem of political clientelism in the allocation of benefits and considers the level of coordination that is taking place across programmes and political institutions. Combining rich empirical findings with data about labour market outcomes and institutions this book will be an important read for researchers wishing to understand the political economy of youth employment policy in Africa.

Roaming Africa van Reisen, Mirjam, Mawere, Munyaradzi, Stokmans, Mia, Gebre-Egziabher, Kifle Abraha, 2019-10-24 What happens when digital innovation meets migration? *Roaming Africa* considers how we understand modern day mobility in Africa where age old routes strengthen the resilience of people roaming the continent for livelihoods and security assisted by mobile communication. Digital mobility expands connectivity around the world and also in Africa. In this book the authors show that mobility resilience and social protection in the digital age are closely related. Each chapter takes a close look at the migration dynamics in a specific context using social theory as a lens. This book adopts a critical perspective on approaches in which migration is regarded merely as a hazard. Edited by distinguished scholars from Africa and Europe this volume is the second in a four part series: *Connected and Mobile Migration and Human Trafficking in Africa* compiles chapters from a diverse group of young and upcoming scholars making an important contribution to the literature on migration studies, digital science, social protection and governance.
