Art and Illusionists Nicholas Wade, 2015-10-12 We delight in using our eyes particularly when puzzling over pictures Art and illusionists is a celebration of pictures and the multiple modes of manipulating them to produce illusory worlds on flat surfaces This has proved fascinating to humankind since the dawning of depiction Art and illusionists is also a celebration of the ways we see pictures and of our ability to distil meaning from arrays of contours and colours Pictures are not only a source of fascination for artists who produce them but also for scientists who analyse the perceptual effects they induce Illusions provide the glue to cement the art and science of vision Painters plumb the art of observation itself whereas scientists peer into the processes of perception Both visual artists and scientists have produced patterns that perplex our perceptions and present us with puzzles that we are pleased to peruse Art and illusionists presents these two poles of pictorial representation as well as presenting novel perceptual portraits of the artists and scientists who have augmented the art of illusion The reader can experience the paradoxes of pictures as well as producing their own by using the stereoscopic glasses enclosed and the transparent overlay for making dynamic moir patterns

The Cinema and Its Shadow Alice Maurice, 2013-03-15 The Cinema and Its

Shadow argues that race has defined the cinematic apparatus since the earliest motion pictures especially at times of technological transition In particular this work explores how racial difference became central to the resolving of cinematic problems the stationary camera narrative form realism the synchronization of image and sound and perhaps most fundamentally the immaterial image the cinema's shadow which figures both the material reality of the screen image and its racist past Discussing early race subjects Alice Maurice demonstrates that these films influenced cinematic narrative in lasting ways by helping to determine the relation between stillness and motion spectacle and narrative drive The book examines how motion picture technology related to race embodiment and authenticity at specific junctures in cinema's development including the advent of narrative feature films and sound In close readings of such films as *The Cheat* *Shadows* and *Hallelujah* Maurice reveals how the rhetoric of race repeatedly embodies film technology endowing it with a powerful mix of authenticity and magic In this way the racialized subject became the perfect medium for showing off shoring up and reintroducing the cinematic apparatus at various points in the history of American film Moving beyond analyzing race in purely thematic or ideological terms Maurice traces how it shaped the formal and technological means of the cinema
