Success and failure in the UK car manufacturing industry Great Britain: Parliament: House of Commons: Trade and Industry Committee, 2007-03-29 Although initially sparked by the collapse of MG Rover this inquiry into the UK automotive industry was broadened to examine the following subjects the principal reasons for the different records of success by different companies how companies arrive at investment and closure decisions the role played by trade unions the appropriate Government response to closure announcements and what the Government could do to help the supply chain and workforce if plants are closed Overall it foresees mixed prospects for car manufacturing in this country and thinks it is important that the industry and Government put extra effort into improving skills increasing R D adopting lean manufacturing techniques and strengthening the local supply chain

The New Domestic Automakers in the United States and Canada A.J. Jacobs, 2015-12-16 Over the past forty years state provincial and local governments in the United States and Canada have provided foreign automakers with approximately 4 80 billion in incentives in order to lure light vehicles assembly plants to their areas This has included tax abatements infrastructure construction land giveaways job training programs and other subsidies As of early 2015 ten foreign vehicle makers operated 20 light vehicles in developed North America Despite the fact that all ten of these automakers have pursued a similar pattern first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America each has followed its own specific historical development path and has created its own unique growth trajectory This book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the United States and or Canada through early 2015 In addition it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the United States and Canada This includes the first foreign automaker to build its cars in the United States De Dion Bouton of France in July 1900 the early 20th Century endeavors of Fiat Mercedes and Rolls Royce and the present day hopes of Chinese and Indian automakers In the process the text also provides an assessment of the top competing states and sites for any future plants the possible incentives packages governments may offer to attract such facilities and an estimated incentive value for each automaker Overall the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more holistic look at the pros and cons of attracting Automobile Manufacturing FDI It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant Its findings should also prove informative to urban and regional planning political science sociology economics labor and international development scholars and students in North America and worldwide

Birmingham's Industrial Heritage R.M Shill, 2003-10-17 Birmingham was a renowned manufacturing centre by the 18th century and the city rapidly grew into the primary industrial

centre of the Midlands An account of Birmingham s heyday of heavy industry is recorded and the story is brought up to date with the story of the decline of heavy industry and its subsequent replacement by design technology and computing The proposed redevelopment of Rover s Longbridge site as a science park is symptomatic of this change

The Impacts of Automotive Plant Closure Andrew Beer,Holli Evans,2013-09-13 Economic restructuring has been a notable feature of so called mature industrial economies such as the UK and Australia in the last two decades with deregulation privatisation technological change and globalisation combining to reshape such economies Some industries have grown while others have declined Moreover while overall employment in the UK and Australia has grown many newly created positions require skills not found in the industries shedding labour or are in casualised and low paid occupations Many lesser skilled workers leaving declining industries are therefore at risk of long term unemployment or leaving the workforce entirely Both mental and physical health can be affected after redundancy It is therefore crucial that the measures put in place in many domains of social policy such as formal health policy employment assistance community development housing assistance and so on to adequately address the difficulties confronting this group This volume takes a closer look at the impact of manufacturing notably automotive plant closures in the UK Birmingham and Australia Adelaide in recent years and policy responses to those closures It attempts to tease out differences in policy response and effectiveness and attempts to identify areas where policy could be made to work better in terms of adjusting to large scale manufacturing change and resulting job losses In so doing it begins for the first time we believe to take a comparative approach to understanding the impact of plant closures and policy responses This book was published as a special issue of Policy Studies

MG Century David Knowles,2024-03-12 Celebrate and explore 100 years of MG cars with this impressive volume featuring expert commentary historical images period ads and contemporary photography For many car enthusiasts MG is synonymous with sports car It is often credited with igniting a passion for European cars in postwar America at a time when roads were otherwise filled with the lumbering output of Detroit In MG s native England the company s cars filled roles from family transport to competition driving MG as we think of it today began in the 1920s but its roots go back even further with a young William Morris Initially working in the booming bicycle trade he eventually branched into motorcycle and car repair with the fledgling Morris Garage hence MG in 1907 By the mid 1920s the successful Morris Garages was in a position to begin manufacture of its own cars under the MG name MG grew significantly in the years before World War II building and racing its classic Midgets and Magnettes World War II provided challenging times for the company as it did for the UK and much of the world In the postwar period a focus on sales outside England and particularly in the United States both defined MG s product line and ensured its success Legendary cars followed including MG TC TD and TF followed by thoroughly modern MGA MGB MGB GT and Midget Magnettes and the 1100 offered options for those wanting sedans and more practical cars MG ownership moved through a number of UK companies in the postwar period as well as ownership by BMW and today s SAIC a Chinese based company through which it

operates as MG Motor Highlights along the way included the MGB GT V8 MG Metro Group B rally car and MGF Based on its latest state of the art EV platform MG will soon launch an all new roadster coming full circle over its century in business
