Woolverton, 2021-07-06 There are two types of conflict in congregations conflict that kills and conflict that cultivates growth So argues David E Woolverton in Mission Rift Leading through Church Conflict Conflict that kills that damages or destroys teams ministries missions vibrancy occurs when we as the people of God forget who we are why we're here and where we're going in carrying out the divine mission Conflict that cultivates growth often begins with the same scenarios but leaders see conflict as a context for learning how to live together as a people called to transform their neighborhoods schools and workplaces In Mission Rift Woolverton reorients our view of congregational conflict In part 1 he examines conflict from a theological and ecclesiological framework exploring why it is essential to discipleship and mission In part 2 he presents six principles of missional leadership challenging pastors and other leaders to define themselves within the frameworks of spiritual formation and family systems and then to create environments that facilitate growth in faith communities Rather than resolve conflict too quickly Woolverton explains lest we inadvertently sabotage the potential it has to draw a congregation toward spiritual growth wise leaders recognize that a lack of conflict may be a symptom of missional decline rather than congregational unity When the church pursues its divine mission first conflict may become essential for defining its mission priorities Successfully leading through conflict toward a transformative end will empower a congregation's witness within its community and beyond **Working with High-Risk Adolescents** Matthew D. Woolverton, 2024-02-12 Being a mission driven leader is hard Being a mission driven leader who knows how to navigate the emotions of loss and grief connected to leadership is harder still It takes a vulnerable leader to lead well one who has faced into their own losses and can let those losses equip their character for God's greater plans Not all leaders are willing Not all leaders are able Yet according to David Woolverton leaders vulnerability to the emotional processes of grief is essential for the overall health of the organizations they lead and for the well being and discipleship of those under their direction Grief he says is best viewed as a mosaic where each of our significant losses forms a constellation of tiles that when seen together over time helps tell a story of God's redemptive love grace and mission a story desperately needed within today's post pandemic angst Using Elisabeth Kubler Ross's five stages of grief denial anger bargaining depression and acceptance as a guide along with five biblical prophet mentors Woolverton presents five strategies to equip pastors and leaders in negotiating with their losses to attain organizational resilience sustainability and vibrancy *Managing Human Behavior in Public and Nonprofit Organizations* Robert B. increasingly protracted involving more nonstate groups and regional and international actors. It is estimated that by 2030 the horizon set by the international community for achieving the Sustainable Development Goals, more than half of the world's poor will be living in countries affected by high levels of violence. Information and communication technology, population movements, and climate change are also creating shared risks that must be managed at both national and international levels. Pathways for Peace is a joint United Nations World Bank Group study that originates from the conviction that the international community's attention must urgently be refocused on prevention. A scaled-up system for preventive action would save between US \$5 billion and US \$70 billion per year, which could be reinvested in reducing poverty and improving the well-being of populations. The study aims to improve the way in which domestic development processes interact with security, diplomacy, mediation, and other efforts to prevent conflicts from becoming violent. It stresses the importance of grievances related to exclusion from access to power, natural resources, security, and justice, for example, that are at the root of many violent conflicts today. Based on a review of cases in which prevention has been successful, the study makes recommendations for countries facing emerging risks of violent conflict, as well as for the international community. Development policies and programs must be a core part of preventive efforts when risks are high, or building up inclusive solutions through dialogue. Adapted macroeconomic policies, institutional reform, and redistributive policies are required. Inclusion is key, and preventive action needs to adopt a more people-centered approach that includes mainstreaming citizen engagement. Enhancing the participation of women and youth in decision-making is fundamental to sustaining peace, as well as long-term policies to address the aspirations of women and young people.

Megaproject Organization and Performance Nuno Gil, Colm Ludrigan, Jeffrey Pinto, Phanish Puranam, 2017-07-24. Megaproject Organization and Performance: The Myth and Political Reality delves into the complex world of organizing megaprojects and investigates the extent to which the performance of these projects could be traced back to their organizational structure. Through multiple case study research, including the London Olympic Park and Heathrow Airport Terminal 2, the authors show how megaprojects are unique in how they are organized. They explore core periphery relationships between promoters who control strategic choices and suppliers, the contracted experts who provide the actual resources to get the project done. The implications of these structural performance relationships within a robust economy are then compared with railroad and highway development projects in the developing economies of Nigeria, Uganda, and India. This in-depth study brings a complementary perspective to megaproject literature and enables us to reconcile conflicting explanations for the regularity with which megaprojects miss performance targets. With pluralism at the core of the megaproject's organizational structure, the authors argue that megaprojects work best when accountability is shared and everyone has a stake in the final outcome.
