Key Concepts In Governance Sage Key Concepts Series:

Key Concepts in Governance Mark Bevir, 2008-12-18 A comprehensive multidisciplinary examination of the concepts embodied in governance and their wide ranging applications and implications An important read and reference for students and academics in the social sciences particularly those engaged in public policy studies Professor Carolyn J Heinrich University of Wisconsin Madison An authoritative short survey for which students and teachers alike will be profoundly grateful Professor Rod Rhodes University of Tasmania and Australian National University Students of governance will welcome this book given the explosion of literature in the field It provides a quick guide to key concepts and ideas but does so with considerable originality We are offered not just a review of well established positions but a distinctive take on the governance debate Gerry Stoker Professor of Governance University of Southampton The language of governance has risen to prominence in the last 20 years as a way of describing and explaining changes in the nature and role of the state but the concepts involved can be confusing as they are often new and come from diverse disciplinary and theoretical settings Key Concepts in Governance provides a clear introduction to the technical concepts and policies of contemporary governance through short definitional essays Each entry features a snapshot definition of the concept a contextualization of the concept an overview of relevant debates a guide to further reading The book also includes a substantial introductory chapter which gives an overview of governance studies as a whole orientating and guiding the reader around the issues that the concepts address Highly readable with clear cross referencing this is an ideal book for students on introductory courses and an indispensable resource for anyone interested in governance [Routledge Handbook of Urban Food Governance](#) Ana

Moragues-Faus, Jill K. Clark, Jane Battersby, Anna Davies, 2022-10-20 The Routledge Handbook of Urban Food Governance is the first collection to reflect on and compile the currently dispersed histories concepts and practices involved in the increasingly popular field of urban food governance Unpacking the power of urban food governance and its capacity to affect lives through the transformation of cities and the global food system the Handbook is structured into five parts The first part focuses on histories of urban food governance to trace the historical roots of current dynamics and provide an impetus for the critical lens on urban food governance threaded through the Handbook The second part presents a broad overview of the different frames theories and concepts that have informed urban food governance scholarship Drawing on the previous parts part three engages with the practice of urban food governance by analysing plans policies and programmes implemented in different contexts Part four presents current knowledge on how urban food governance involves different agencies that operate across scales and sectors The final part asks key figures in this field what the future holds for urban food governance in the midst of pressing societal and environmental challenges Containing chapters written by emerging and established scholars as well as practitioners the Handbook provides a state of the art global and diverse examination of the role of cities in delivering sustainable and secure food outcomes as well as providing refreshed theoretical and practical tools to

understand and transform urban food governance to enact more sustainable and just futures The Routledge Handbook of Urban Food Governance will be essential reading for students scholars practitioners and policymakers interested in food governance urban studies sustainable food and agriculture and sustainable living more broadly *Sustainability and Law* Volker Mauerhofer, Daniela Rupo, Lara Tarquinio, 2020-07-07 The book discusses sustainability and law in a multifaceted way Together sustainability and law are an emerging challenge for research and science This volume contributes through an interdisciplinary concept to its further exploration The contributions explore this exciting domain with innovative ideas and replicable approaches It combines a variety of authors from both the public and the private sectors and thereby guarantees a broad view that enshrines the more theoretical arguments from the academic side as well as stronger practical applicable perspectives The book provides space for thoughtful expansions of established theories as well as the hopeful emergence of innovative ideas Moreover the combination of three to five contributions into the eleven parts respectively aims toward a compression of like minded thoughts This should lead to an intensification of exchange of viewpoints from different angles on a similar theme Readers therefore also have the opportunity to concentrate on single chapters but receive comprised knowledge and a variety of thoughts for new ideas on a particular theme *The Changing Context of Local Democracy* Hubert Heinelt, 2016-02-05 Political leadership at the local level has attracted growing attention in recent years in parallel with reforms of local government and of the municipal administration as well as the debate on a shift from government to governance But this debate is mainly focused on single leaders i e mayors or executive officers Considering the power triangle of i the mayor ii the municipal administration executive officers and iii the council it is surprising that councillors have gained little interest so far The aim of this book is to reflect on the role and task perception as well as the behaviour of councillors in the changing context of local democracy The chapters start from a common conceptual framework We start from the hypothesis that the role perception as well as the behaviour of councillors can not be conceived of being determined directly by i both formals and informal institutional structures as well as by ii personal characteristics Instead we argue that the perceptions and behaviour of councillors are depending on their notion of democracy However the understanding of democracy can be affected by institutional structure but not solely by such organisational arrangements but depending on personal characteristics of the councillors This book was published as a special issue of Local Government Studies **The Medieval Foundations of International Law** Dante Fedele, 2021-04-26 Dante Fedele s new work of reference reveals the medieval foundations of international law through a comprehensive study of a key figure of late medieval legal scholarship Baldus de Ubaldis 1327 1400 A student of Bartolus de Sassoferrato Baldus wrote both extensive commentaries on Roman canon and feudal law and thousands of consilia originating from particular cases His writings dealt with numerous issues related to sovereignty territorial jurisdiction diplomacy and war combining a rich conspectus of earlier scholarship with highly creative ideas that exercised a profound influence on later juristic thought The detailed picture of the international law

doctrines elaborated by a prominent medieval jurist offered in this study contributes to our understanding of the intellectual archaeology of international law Dr Fedele's monograph will no doubt become a necessary work of reference for any scholar interested in the history of international law Beyond the specific doctrines on particular areas of international law Dr Fedele's study of Baldus shows how in the area of international governance jurists sought to marshal different expressions of normativity Alain Wijffels Foreword

The Coordination of European Public Hospital Systems Sorin Dan, 2016-11-18 This book engages theoretically and empirically with the unprecedented wave of public management reforms in public hospitals in Europe in the past 25 years It provides a useful overview of these reforms and studies the way in which they have influenced the ability of national policy making institutions to co ordinate the system of public hospitals as a whole Using a comparative structure as well as original empirical data collected by the author the book examines case studies on which little has so far been published for an international audience in English

The New Public Service Janet V. Denhardt, Robert B. Denhardt, 2015-03-12 The New Public Service Serving not Steering provides a framework for the many voices calling for the reaffirmation of democratic values citizenship and service in the public interest It is organized around a set of seven core principles 1 serve citizens not customers 2 seek the public interest 3 value citizenship and public service above entrepreneurship 4 think strategically act democratically 5 recognize that accountability isn't simple 6 serve rather than steer and 7 value people not just productivity The New Public Service asks us to think carefully and critically about what public service is why it is important and what values ought to guide what we do and how we do it It celebrates what is distinctive important and meaningful about public service and considers how we might better live up to those ideals and values The revised fourth edition includes a new chapter that examines how the role and significance of these New Public Service values have expanded in practice and

research over the past 15 years Although the debate about governance will surely continue for many years this compact clearly written volume both provides an important framework for a public service based on citizen discourse and the public interest and demonstrates how these values have been put into practice It is essential reading for students and serious practitioners in public administration and public policy

Cognitive Risk James Bone, Jessie H Lee, 2023-04-18 Cognitive Risk is a book about the least understood but most pervasive risk to mankind human decision making Cognitive risks are subconscious and unconscious influence factors on human decision making heuristics and biases To understand the scope of cognitive risk we look at case studies corporate and organizational failure and the science that explains why we systemically make errors in judgment and repeat the same errors The book takes a multidisciplinary and pedestrian stroll through behavioral science with a light touch using stories to explain why we consistently make cognitive errors that not only increase risks but also simultaneously fail to recognize these errors in ourselves or our organizations This science has deep roots in organizational behavior psychology human factors cognitive science and behavioral science all influenced by classic philosophers and enabled through advanced analytics and artificial intelligence The point of the book is simple Humans persist with bounded rationality but as the speed of information data money and life in general accelerates we will need the right tools to not only keep pace but to survive and thrive In light of all these factors that complicate risk the book offers a foundational solution A cognitive risk framework for enterprise risk management and cyber security There are five pillars in a cognitive risk framework with five levels of maturity yet there is no universally prescribed maturity level It is more a journey of different paths Each organization will pursue its own path but the goal is the same to minimize the errors that could have been avoided We explain why risks are hard to discuss and why we systematically ignore the aggregation of these risks hidden in collective decision making in an organization The cognitive risk framework is a framework designed to explore the two most complex risks organizations face uncertainty and decision making under uncertainty The first pillar is cognitive governance which is a structured approach for institutionalizing rational decision making across the enterprise Each pillar is complementary and builds on the next in a succession of continuous learning There is no endpoint because the pillars evolve with technology Enterprise risk is a team effort in risk intelligence grounded in a framework for good decision making We close with a call to become designers of risk solutions enabled by the right technology and nurtured by collaboration We hope you enjoy the book with this context

Poverty, Inequality, and Innovation in the Global South Oliver Mtapuri, 2023-03-03 This edited volume analyzes the experiences learned in practice especially among small holder farmers to eradicate poverty In other words it discusses practical solutions which small scale farmers can use to alleviate poverty and reduce inequality This addresses the issue of inclusive and sustainability of projects leading to the notion of not leaving anyone behind The book provides insights that can be translated into policy with potential to inform practice It also has the potential to address the issue of rural urban migration by providing knowledge that is usable by small scale farmers policy

makers and entrepreneurs alike The volume is written by authors from different countries Nigeria Tanzania and Zimbabwe indicating the commonality of the problems of poverty and inequality It contains insights from all these countries assembled together into an amalgam of practices ready to use and implement informed by evidence from the field as most of the chapters are based on empirical data *Horizontal Intergovernmental Coordination at Local and Regional Levels* Nathalie Behnke,Bettina Petersohn,2025-09-30 The most pressing policy challenges of our time require complex and coordinated strategies that transcend territorial borders Issues such as climate mitigation sustainable development and the migration crisis all require policy solutions that compel sub national governments at regional and local level to coordinate intensely with others across policy sectors territorial units and state boundaries Yet horizontal coordination is often rendered difficult due to complexities and high transaction costs both in terms of time and effort Adopting a comparative approach this open access volume provides a unifying perspective and a shared conceptual tool kit for analysing the nature intricacies and possibilities of horizontal coordination at local and regional level It also offers guidelines and recommendations for achieving coordination in everyday policymaking Bringing together scholars and practitioners from twenty European countries the book provides profound insights into patterns of horizontal coordination across the continent It will appeal to scholars and students of public administration public policy governance and territorial politics as well as practitioners and policy makers

Making Healthy Places, Second Edition Nisha Botchwey,2022-07-12 Making Healthy Places surveys the many intersections between health and the built environment from the scale of buildings to the scale of metro areas and across a range of outcomes from cardiovascular health and infectious disease to social connectedness and happiness This new edition is significantly updated with a special emphasis on equity and sustainability and takes a global perspective It provides current evidence not only on how poorly designed places may threaten well being but also on solutions that have been found to be effective Making Healthy Places is a must read for students academics and professionals in health architecture urban planning civil engineering parks and recreation and related fields Key Concepts in Health Studies Chris Yuill,Iain Crinson,Eilidh Duncan,2010-02-18 Key Concepts in Health Studies provides a much needed guide to the central concepts used across the subject and offers the reader a comprehensive overview of the core topics theories and debates Drawing together the fundamentals within the disciplines of health nursing and social policy this book is an ideal text both for students studying health in a range of academic fields and for health and social care practitioners From ageism to public health and gender to obesity the book offers an exciting guide to the multidisciplinary field Each entry features A snapshot definition of the concept A wider discussion of the main issues Case studies illustrating the application of theory to practice Examples of further reading Highly readable with clear indexing and cross referencing between entries this is not only a student friendly textbook that will enable the reader to dip into and update their knowledge of a particular key concept but a valuable resource to anyone practicing in the health care field **Urban Climate and Adaptation Tools** Teodoro

Georgiadis,Letizia Cremonini,2021-03-02 There is pressing evidence of phenomena linked to meteorology and climate which are modifying their temporal occurrence and which have a very evident impact on the safety and health of populations residing in cities The urban problem at the beginning of the second set of twenty years of the new century requires a complete rethinking of the way of aggregation of man who today represents a large part of the world population due to increasingly accelerated urbanization processes over time The human being has become a citizen and within the city limits he tries to develop his life expectancy by seizing opportunities from this This search for well being understood as a complete state of man at once physiological and psychological and social can be thwarted by an urban structure that is not functionally capable of providing answers The climate problem exacerbates this problem by strongly stressing the contradictions of living Science technology and politics are today able to give answers if applied wisely in a joint effort in a unit of language This book proposes several solutions that can be implemented today ranging from a full understanding of phenomena to adaptation policies for solving problems The most pressing invitation is addressed precisely to politics to make cities more resilient and safe

Australia's Toxic Medical Culture Vicki Adele Pascoe,2018-10-11 This book explores dominance in Australia s medical culture through the positioning of international medical graduates IMGs It argues that IMGs are othered and ultimately positioned as an underclass a positioning validated and reinforced by the intersecting inequalities of class race and nation It also suggests that the positioning of IMGs is organised through the dimensions of structural power hegemonic power and interpersonal power which allow an exploration of power relations between the structures of the health system the Australian medical profession and the agency of IMGs The Australian narrative presented to the world espouses a community of social justice and human rights Instead an historical lens traces the formation and persistence of difference represented in ethnocentrism racism and xenophobia from 1788 to the present The research presented is multidisciplinary in scope An anti oppressive theoretical framework enables the voices of lived experience to penetrate throughout and a social justice platform engages the participants and the reader into the interwoven conversations The data set comprises a focus group 10 individual interviews with IMGs and a selection of inquiry submissions revealing rich and sometimes shocking evidence to paint a stark picture Other medical voices join the conversation via media responses to revelations of experiences not only by IMGs but also by Australian trained doctors It exposes a toxic culture endemic with bullying and sexual harassment This book is of interest to practitioners researchers and administrators in the fields of medical education human resource management legal studies health sciences social sciences health services government departments universities and hospitals as well as those tasked with duty of care and the provision of a safe workplace The voices gifted to this study raise awareness of current issues within medicine in Australia at a very personal level and begin to formulate a policy and practical response to address these disturbing revelations
