Making Faces Jacky Bahbout:

Making Faces! Jacky Bahbout, 2015-09-25 A silly but fun approach to children's activity books that allows kids to be the star in their own drawings. Based on the idea of a photo booth where masks and other props set the scene for entertaining photographs. *Making Faces* is a hands-on fill-in art pad that allows children ages three and up to use their imagination to complete a picture, then tear off the sheet and poke their face through the hole posing for the camera if they choose. They can turn themselves into kings and queens wearing crowns, astronauts wearing bubble helmets and flowers with pretty petals. They color in floppy ears to become rabbits, shaggy manes to become lions and pointy horns to become dinosaurs. Each of the thirty-two activity pages has a theme or suggestion such as 'I'm the captain' or 'I'm Monster-ous' with simple drawings such as fish or googly eyes that serve as a guide and suggestions on how children can make each illustration their own. **Digital**

Personalization in Early Childhood Natalia Kucirkova, 2017-09-07 Digital personalization is an emerging interdisciplinary research field with application to a variety of areas including design education and publication industry. This book focuses on children's education and literacy resources which have undergone important changes with the personalization revolution in the early 21st century. The author develops original insights from educational research and her own studies concerned with digital and non-digital personalization to discuss in a clear and critical way the thinking research issues and practical implications of this new field. She scrutinises the character of technology-based personalized education to substantiate the claim that the current models of personalized education tend to be technology and business driven with little pedagogical understanding of the social value of personalization. Research involving touchscreens, personalized books and 2-8 year olds is interrogated for its impact on children's development of language, creativity, identity as well as family dynamics and classroom dialogue. The literature available on digital and non-digital personalization is discussed in relation to five key themes of personalized education: the so-called 5As: autonomy, authorship, aesthetics, attachment and authenticity. It is argued that the 5As need to be anchored in humanist principles for a sustainable pedagogy and practice. Based on the insights from research with typically and atypically developing children, Kucirkova proposes personalised pluralisation as a pedagogical framework of personalized education for the future. The book aims to help scholars and professionals understand the connections between personalization and literacy, personalization and education and personalization and wider socio-moral issues. *Funny Face!* Jacky Bahbout, 2014-11-11 An ingeniously constructed drawing book that allows children to create a range of funny faces. *Funny Face* is an activity book in which things aren't quite what they seem. Inspired by the idea of visual puns, the book allows children to draw, shade and fold to make surprising and funny things happen to pictures of all kinds of faces. Using clever but simple methods, the book helps children create a range of witty visual gags. Doodle through a die-cut and shaggy eyebrows on one picture turn into a droopy moustache on the picture beneath. Open a gatefold to make a little boy's tiny ears become gigantic. Draw pictures on split pages to create faces with different hats, noses and beards. Turn the

pages back and forth to find all the tricks and make all the funny faces Children will be delighted and surprised when by creating one funny face they unexpectedly make another funny face on a different page Enhanced by Hannah Warren s entertaining range of cheeky naughty smiling and jolly faces presented through rich colors and a sturdy format **Funny Face** offers hours of entertainment for energetic and creative children
