Making Human Rights A Reality:

Making Human Rights a Reality Emilie M. Hafner-Burton, 2013-03-21 In the last six decades one of the most striking developments in international law is the emergence of a massive body of legal norms and procedures aimed at protecting human rights In many countries though there is little relationship between international law and the actual protection of human rights on the ground Making Human Rights a Reality takes a fresh look at why it s been so hard for international law to have much impact in parts of the world where human rights are most at risk Emilie Hafner Burton argues that more progress is possible if human rights promoters work strategically with the group of states that have dedicated resources to human rights protection These human rights stewards can focus their resources on places where the tangible benefits to human rights are greatest Success will require setting priorities as well as engaging local stakeholders such as nongovernmental organizations and national human rights institutions To date promoters of international human rights law have relied too heavily on setting universal goals and procedures and not enough on assessing what actually works and setting priorities Hafner Burton illustrates how with a different strategy human rights stewards can make international law more effective and also safeguard human rights for more of the world population **Making Human Rights a Reality** Emilie Hafner-Burton, 2013-03-24 Includes bibliographical references pages 199 265 and index Making Human Rights Real Filip Spagnoli, 2007 Here in a nutshell readers may find a description of the most important characteristics of human rights and a clear and concise discussion of the problem of making human rights real and not just hypothetical Building on definitions of human rights used by the United Nations and other international bodies the author describes the main characteristics of the system of human rights universality interdependence differences between types of rights absolute or limited rights the subjects of rights individuals or groups the link between rights and the judicial system and between rights and democracy He then discusses some of the instruments we can use to promote respect for human rights the means by which we might make these rights real for a greater portion of humanity Along the way he analyzes some of the related controversies regarding sovereignty international intervention and globalization and questions of cultural imperialism as they bear upon human rights Do we have a right to impose rights or to defend ourselves from such intervention This systematic discussion presents a complex and difficult topic in an understandable framework accessible to the general public and will stand as a useful foundation for readings of more specialized scientific legal and philosophical works Where most human rights books for the nonspecialist focus on specific instances of rights abuses this work provides a more general approach focused on the logic in the system of human rights Filip Spagnoli obtained his PhD at the University of Brussels He has written numerous OpEd articles in leading Belgian newspapers and specialized articles in philosophical periodicals and two books Homo Democraticus On the Universal Desirability but the Not So Universal Possibility of Democracy and Human Rights 2003 and Democratic Imperialism A Practical Guide 2004 Employed by the research and statistics directorate of the

HCHR News United Nations. Office of the High Commissioner for Human Rights,1995 Making Human Rights Intelligible Mikael Rask Madsen,Gert Verschraegen,2013-03-20 Human rights have become a defining feature of contemporary society permeating public discourse on politics law and culture But why did human rights emerge as a key social force in our time and what is the relationship between rights and the structures of both national and international society By highlighting the institutional and socio cultural context of human rights this timely and thought provoking collection provides illuminating insights into the emergence and contemporary societal significance of human rights Drawn from both sides of the Atlantic and adhering to refreshingly different theoretical orientations the contributors to this volume show how sociology can develop our understanding of human rights and how the emergence of human rights relates to classical sociological questions such as social change modernisation or state formation Making Human Rights Intelligible provides an important sociological account of the development of international human rights It will be of interest to human rights scholars and sociologists of law and anyone wishing to deepen their understanding of one of the most significant issues

of our time The End of Human Rights Costas Douzinas, 2000-06-01 The introduction of the Human Rights Act has led to an explosion in books on human rights yet no sustained examination of their history and philosophy exists in the burgeoning literature At the same time while human rights have triumphed on the world stage as the ideology of postmodernity our age has witnessed more violations of human rights than any previous less enlightened one This book fills the historical and theoretical gap and explores the powerful promises and disturbing paradoxes of human rights Divided in two parts and fourteen chapters the book offers first an alternative history of natural law in which natural rights represent the eternal human struggle to resist domination and oppression and to fight for a society in which people are no longer degraded or despised At the time of their birth in the 18th century and again in the popular uprisings of the last decade human rights became the dominant critique of the conservatism of law But the radical energy symbolic value and apparently endless expansive potential of rights has led to their adoption both by governments wishing to justify their policies on moral grounds and by individuals fighting for the public recognition of private desires and has undermined their ends Part Two examines the philosophical logic of rights Rights the most liberal of institutions has been largely misunderstood by established political philosophy and jurisprudence as a result of their cognitive limitations and ethically impoverished views of the individual subject and of the social bond The liberal approaches of Hobbes Locke and Kant are juxtaposed to the classical critiques of the concept of human rights by Burke Hegel and Marx The philosophies of Heidegger Strauss Arendt and Sartre are used to deconstruct the concept of the legal subject Semiotics and psychoanalysis help explore the catastrophic consequences of both universalists and cultural relativists when they become convinced about their correctness Finally through a consideration of the ethics of otherness and with reference to recent human rights violations it is argued that the end of human rights is to judge law and politics from a position of moral transcendence This is a comprehensive historical and theoretical examination of the discourse and practice of human rights Using examples from recent moral foreign policies in Iraq Rwanda and Kosovo Douzinas radically argues that the defensive and emancipatory role of human rights will come to an end if we do not re invent their utopian ideal *A Practical Guide to Human Rights in Local Government* Shadrack Gutto, 1996 *Building Capacity of National Human Rights Institutions* Bipin Adhikari, 2004 **Annual Report on Human Rights** Council of the European Union, 1998 **Article 33 of the UN Convention on the Rights of Persons with Disabilities** Gauthier de Beco, 2013-06-15 This book provides an in depth examination of Article 33 of the UN Convention on the Rights of Persons with Disabilities CRPD Article 33 of the CRPD requires that for persons with disabilities States parties 1 designate focal points and if required coordination mechanisms 2 designate or establish independent mechanisms and 3 guarantee the participation of civil society The book aims to contribute to a better understanding of the national structures for the implementation and monitoring of the CRPD In addition to analysing Article 33 of the CRPD in a theoretical part it studies its application through case studies on the following six EU Member States Denmark the United Kingdom Italy

Slovenia Austria and Spain **SGI Quarterly** ,2007 Peace culture and education from a Buddhist perspective

Organization of African Unity Amnesty International,1998 The document looks first at the African Commission on Human and Peoples Rights as the mechanism created by the OAU specifically to promote and protect human rights Then it examines the other mechanisms of the OAU and their role in human rights protection Finally it makes recommendations regarding the important role which the political organs should play in preventing human rights violations Adapted from the Summary

From Human Trafficking to Human Rights Alison Brysk,Austin Choi-Fitzpatrick,2012-01-31 Over the last decade public political and scholarly attention has focused on human trafficking and contemporary forms of slavery Yet as human rights scholars Alison Brysk and Austin Choi Fitzpatrick argue most current work tends to be more descriptive and focused on trafficking for sexual exploitation In *From Human Trafficking to Human Rights* Brysk Choi Fitzpatrick and a cast of experts demonstrate that it is time to recognize human trafficking as more a matter of human rights and social justice rooted in larger structural issues relating to the global economy human security U S foreign policy and labor and gender relations Such reframing involves overcoming several of the most difficult barriers to the development of human rights discourse women's rights as human rights labor rights as a confluence of structure and agency the interdependence of migration and discrimination the ideological and policy hegemony of the United States in setting the terms of debate and a politics of global justice and governance Throughout this volume the argument is clear a deep human rights approach can improve analysis and response by recovering human rights principles that match protection with empowerment and recognize the interdependence of social rights and personal freedoms Together contributors to the volume conclude that rethinking trafficking requires moving our orientation from sex to slavery from prostitution to power relations and from rescue to rights On the basis of this argument *From Human Trafficking to Human Rights* offers concrete policy approaches to improve the global response necessary to end slavery responsibly
