**Japanese Military Strategy in the Pacific War** James B

Wood,2023-06-14 In this provocative history James B Wood challenges the received wisdom that Japan's defeat in the Pacific was historically inevitable He argues instead that it was only when the Japanese military prematurely abandoned its original sound strategic plan to secure the resources Japan needed and establish a viable defensible perimeter for the Empire that the Allies were able to regain the initiative and lock Japanese forces into a war of attrition they were not prepared to fight The book persuasively shows how the Japanese army and navy had both the opportunity and the capability to have fought a different and more successful war in the Pacific that could have influenced the course and outcome of World War II It is therefore a study both of Japanese defeat and of what was needed to achieve a potential Japanese victory or at the very least to avoid total ruin Wood's argument does not depend on signal individual historical events or dramatic accidents Instead it examines how familiar events could have b

Lost Decade Robert D. Blackwill, Richard Fontaine, 2024 Across the political spectrum there is wide agreement that Asia should be at the center of US foreign policy But this worldview the Pivot to Asia announced by the Obama Administration in 2011 is a dramatic departure from the entire history of American grand strategy Ten years on we now have some perspective to evaluate it in depth In *The Lost Decade* Robert Blackwill and Richard Fontaine take this long view They conclude that there are few successes to speak of and that we lack a coherent approach to the Indo Pacific region They examine the Pivot through various lenses situating it historically in the context of America's global foreign policy revealing the inside story of how it came about assessing the effort thus far identifying the ramifications in other regions namely Europe and the Middle East and proposing a path forward

*How Wars Are Won and Lost* John A. Gentry, 2011-11-10 This provocative book seeks to answer a most crucial and embarrassing question concerning the U S military why the United States is so often stymied in military confrontations with seemingly weaker opponents despite its superpower status This fascinating book examines a question that continues to puzzle soldiers statesmen and scholars why do major powers including the ostensible superpower United States repeatedly perform poorly against seemingly overmatched adversaries And what can they and the United States do to better achieve their military objectives *How Wars are Won and Lost* Vulnerability and Military Power argues that beyond relying solely on overwhelming military might the United States needs to focus more on exploiting weaknesses in their adversaries such as national will resource mobilization and strategic miscues just as opposing forces have done to gain advantage over our military efforts The author tests the vulnerability theory by revisiting six conflicts from the Philippine War of 1899 1902 to the ongoing actions in Iraq and Afghanistan showing again and again that victory often depends more on outthinking the enemy than outmuscling them

*Confronting China* James H. Anderson, Daniel R. Green, 2024-10-31 Informed by senior policymakers with extensive

expertise in defense this book provides a comprehensive regional and functional perspective on US policy toward the People's Republic of China. *Confronting China* addresses the central security questions of our generation: How best can the United States deter Chinese aggression and win the peace? China's pursuit of global hegemony reflects a patient yet determined effort to reshape the international order in its favor. Deterring Chinese aggression and winning the peace necessitates an integrated approach that draws upon all instruments of US national power. Drawing on the insightful analysis of more than a dozen senior national security practitioners, chapters discuss the China challenge from multiple perspectives. Contributors examine the different dimensions of China's growing power and assess how well they advance the Chinese Communist Party's political ambitions and what must be done to counter them. Drawing upon each writer's particular areas of expertise, chapter authors provide concrete, strategy-based and resource-informed policy recommendations. In the concluding chapter, the editors review common threads and key insights from the preceding chapters, placing them in a larger strategic context.

*Taiwan Conundrum* Martin L. Lasater, 2019-06-18 The Taiwan issue in Sino-American relations remains one of the most complex, controversial, and even dangerous policy dilemmas facing the United States in the post-Cold War period. In an era of growing nationalism on mainland China and Taiwan, tremendous strain is being placed on relations across the Taiwan Strait. As demonstrated by the 1996 Taiwan Strait Crisis, the issue remains a major source of tension between the two superpowers. **Maintenance and Loss of Minority Languages** Willem F. S. J. Koen, 1992 The papers in this volume describe a wide variety of language contact settings in which one or more languages are in a process of shift. In the first part of the book, theoretical perspectives are presented, followed by linguistic, sociological, and descriptive studies of languages and countries that have attracted the interest of researchers before as well as less well-known examples. Data are presented from the Philippines, Korea, Japan, Israel, The Netherlands, Belgium, Canada, Sweden, Spain, Denmark, Morocco, Finland, Malaysia, Germany, USA, Ireland, India, Tanzania, and Australia. **Asia's Aging Security** Andrew L. Oros, 2025-09-09 Major demographic transitions are underway in Asia and the Pacific. The populations of China, Japan, Taiwan, South Korea, and Russia are aging and shrinking, while India, the Philippines, Vietnam, and Australia, among others, continue to grow. How will these striking changes affect regional security dynamics and the United States-led alliance structure in the Indo-Pacific? Andrew L. Oros offers an expert analysis of how rapid aging and population shifts are transforming the military strategies and capabilities of regional powers in Asia. Examining sixteen states, he provides a comparative view of the developing landscape and explores ways to address the consequences. Oros demonstrates that, contrary to what many have claimed, states with shrinking populations will continue to be formidable military powers. He develops a novel theoretical and empirical argument for why rapid aging does not necessarily dampen security competition. Nonetheless, demographic shifts in the coming decades will fundamentally alter the security challenges facing the United States and its allies. Oros considers how technological change and health care advances are mitigating the drawbacks of aging populations, as well as how factors such as autonomous defense systems and artificial intelligence present new
