[Keto Cookbook For Beginners](#) Linda Mitchell,2021-11-20 The ketogenic diet is a very low carb high fat and adequate protein diet for people with certain medical conditions It has many therapeutic benefits that come with it such as improvement in mood energy levels body composition weight loss and more Although the keto diet is not for everyone as some people may feel a little uncomfortable adapting to such a drastic change in their food intake However many others are eager to try it out for themselves due to its amazing benefits Keto Diet Overview The best way to break down the Keto Diet is by breaking down some terms

Carbohydrate Any or all forms of carbohydrates that are found in foods you eat and drink on an empty stomach

Carbohydrates are broken down in your digestive tract and released into the bloodstream as glucose also known as blood sugar

Fat Fat is a molecule found in food that provides energy structure and protection to all types of cells in the body It also transports some vitamins A D E and K throughout the body Fats are made up of an array of fatty acids that differ in size and shape Some examples include short and medium chain fats found in butter along with long chain fats found in coconut oil

Protein Proteins are made up chains of amino acids which serve as the building blocks for every cell tissue organ and system in the human body They also make up your hair skin and nails Some key examples of protein rich foods are chicken eggs salmon beef and pork Carbs vs Proteins Keto Diet Carbohydrates CHO Nuts legumes whole grains and most fruits are the most common sources of CHO that consume Foods containing CHO raise blood sugar levels the quickest and trigger insulin production which can lead to fat storage if a person consumes more CHO than they need Keto Diet Proteins PRO Chicken breast egg whites and cheese are the most common protein sources in the keto diet PRO can be converted into glucose but at a slower rate than CHO due to their structure When combined with fats PRO break down into a substance called ketones which become the primary fuel source for your body Carbohydrates The human body breaks down carbohydrates and converts them into glucose through a process called glycolysis Glucose is then shuttled into cells throughout your body where it is either used as an immediate source of energy or stored as glycogen which can be broken down later as a source of energy When glycogen stores are full the body converts excess glucose in
