Campbell, Richard Hartshorn, 2017 How to Actually Help Your Child with Math Olaseni Fadipe, Ph. D. , 2025-07-19 Help Your Child Fall in Love with Math No Math Degree Required Are numbers causing tears and frustration Wish you could help your child feel more confident with math You're not alone How to Actually Help Your Child with Math is your friendly guide to making math feel less scary and more doable for both you and your child Inside you'll find Simple ways to spot your child's math strengths yes every child has them Fun ideas to weave math into everyday moments Tips for partnering with teachers and tutors and knowing when to ask for help Proven strategies to build your child's confidence and problem solving skills The best part You don't need to remember algebra or geometry to help your child succeed This book is packed with real stories from parents just like you practical ideas you can try today and gentle guidance from a teacher who's been there Ready to transform math from a source of stress to a chance for connection Join other parents who are discovering that supporting their child's math journey can be both simple and rewarding Because every child deserves to feel confident in math and every parent deserves to feel confident helping them *Early Warning Systems and Targeted Interventions for Student Success in Online Courses* Glick, Danny, Cohen, Anat, Chang, Chi, 2020-06-26 Online learning has increasingly been viewed as a possible way to remove barriers associated with traditional face-to-face teaching such as overcrowded classrooms and shortage of certified teachers While online learning has been recognized as a possible approach to deliver more desirable learning outcomes close to half of online students drop out as a result of student-related course-related and out-of-school-related factors e.g. poor self-regulation ineffective teacher-student-student and platform-student interactions low household income Many educators have expressed concern over students who unexpectedly begin to struggle and appear to fall off track without apparent reason A well-implemented early warning system therefore can help educators identify students at risk of dropping out and assign and monitor interventions to keep them on track for graduation

Despite the popularity of early warning systems research on their design and implementation is sparse Early Warning Systems and Targeted Interventions for Student Success in Online Courses is a cutting edge research publication that examines current theoretical frameworks research projects and empirical studies related to the design implementation and evaluation of early warning systems and targeted interventions and discusses their implications for policy and practice Moreover this book will review common challenges of early warning systems and dashboard design and will explore design principles and data visualization tools to make data more understandable and therefore more actionable Highlighting a range of topics such as curriculum design game based learning and learning support it is ideal for academicians policymakers administrators researchers education professionals instructional designers data analysts and students
