Hollander explores the premise that paintings prints and movies move us similarly by virtue of their narrative element which evokes our memories and feelings She argues that we respond to the depiction of glimpses of human life to the realization that we cannot see everything at once and how the rendering of light and spatial composition translates them and keeps them moving into our awareness Thus there is a continuum from the paintings and graphic arts of 15th century northern Europe to the proto cinematic arts of the present ISBN 0 394 57400 1 29 95
