Common drug measures are introduced next, followed by chapters on intravenous medication rates and dosage calculations, instructions on body weight, and finally chapters on pediatric calculations and pediatric medication calculations follow. This new edition of *Curren's Math for Meds* features full-color photos of drug labels and syringes as well as hundreds of examples of calculations, including unit conversions, and even includes online interactive software for developing learners into self-learners. *Curren's Math for Meds* is the only course with help from the master, Anna Curren, and *Curren's Math for Meds: Dosages & Solutions* is the only calculations text to reach more than 2 million learners!
