Yeh,2011-03-01 As a consequence of the federal No Child Left Behind NCLB law there is tremendous pressure on school principals teachers school superintendents district staff state departments of education and governors to maximize the increase in student achievement that is obtained with every dollar of expenditure Currently teachers are forced to rely on extremely inefficient approaches that take enormous amounts of time both during the school day and throughout the K 12 learning years This is experienced in terms of the reduced time that is available to teach subjects other than math and reading as schools resort to double periods of math double periods of reading and enormous amounts of remedial instruction that directly reduce the time available for other subjects including science art and

music In contrast this book suggests that student achievement may be increased in a way that is not only cost effective in dollar terms but efficient in the sense that it does not rely on unusual investments in the time required to obtain results The book draws upon a wealth of cost effectiveness data to dispel common notions about what works in addressing the achievement gap increased expenditure per pupil charter schools voucher programs increased educational accountability class size reduction comprehensive school reform increased teacher salaries more selective teacher recruitment the use of value added methods to measure and reward teacher performance the use of National Board teacher certification to identify high performing teachers and a host of other approaches **Assessment Portfolios for Elementary Students** Milwaukee Public Schools,Kathryn Henn-Reinke,2002 Developed by educators in Milwaukee s public schools and successfully used with over 15 000 students this book will show you how to engage your students in high quality work reveal information about your students which cannot be seen through standardized tests help students become responsible for their own academic growth The tasks and rubrics in this book will help you discover the strengths and learning needs of your students With concrete detailed examples from Kindergarten through 5th grade this book demonstrates how to implement assessment portfolios in your classroom Part I provides concrete details about how to organize implement and maintain assessment portfolios throughout the school year In Part II are assessments in reading writing and math featuring class tested scoring rubrics and samples of student work Also included are learning projects rich classroom activities requiring high quality intellectual work Part III contains student handouts and scoring sheets ready for you to distribute and use with the students in your class
