Math Works Montessori Math And The Developing Brain:

Math Works Michael Duffy, 2014-07-15 This full color book offers clear and concise descriptions of the complete range of Montessori math materials combined with details of how the children use them It is immensely valuable as a ready reference for all Montessori teachers a text for Montessori teachers in training an explanation for parents and administrators of how these ingenious materials enhance children s thinking problem solving and brain development Mr Duffy is an experienced Montessori teacher who is now a teacher trainer 78 pages soft cover Illustrations by the author Photographs by Frida Azariand others Price 14 95 Math Works Michael Duffy, 2008-01-01 This full color book offers clear and concise descriptions of the complete range of Montessori math materials combined with details of how the children use them It is immensely valuable as a ready reference for all Montessori teachers a text for Montessori teachers in training an explanation for parents and administrators of how these ingenious materials enhance children s thinking problem solving and brain development Mr Duffy is an experienced Montessori teacher who is now a teacher trainer 376 78 pages soft cover Illustrations by the author Photographs by Frida Azariand others Price 16 00 *Asperkids* Jennifer Cook, 2012-05-15 Asperkids is an insider s guide full of effective and fun methods for engaging with children with Asperger Syndrome Award winning Aspie teacher and parent Jennifer O Toole discusses theory of mind communication sensory difficulties and how to use a child s special interests to encourage academic social and emotional growth Montessori and Early Childhood Susan Feez, 2009-11-04 Provides a complete overview of Montessori pedagogy and practice It considers the Montessori approach within the context of early childhood education and care and examines it in the light of new insights from the fields of neuroscience and child development *Brain Changers* David P. Sortino, 2020-01-13 Brain Changers The Most Important Advances in Children s Learning and Intelligence represents my second book of The Brain Smart Trilogy This book presents an in depth look at successful learning techniques and current brain research about how to increase children s learning potential at all age levels In my opinion the words brain changing supports an often ignored yet obvious concept that children learn best when they are interested or passionate about learning Our brain s limbic system knows this when it forms emotional connections or attachment bonding to learning For example a major area of our brain associated with the brain changing concept is called the hippocampus In fact the hippocampus is the only part of your child s learning brain where neurons regenerate or make more neurons The medical world connects this positive brain changing experience and calls it brain plasticity or the brain s ability to modify its connections or rewire itself Studies show that without this ability any brain not just the human brain would be unable to develop from infancy to adulthood In my opinion this book s information provides readers with up to date brain research and proven learning techniques to support my brain changing thesis for all individuals interested in helping children reach high levels of learning *Resources in Education* ,1999 Learning to Change the World Walter Bender, Charles Kane, Jody Cornish, Neal Donahue, 2025-09-23 UNESCO estimates that eleven

percent of primary school age children seventy two million worldwide are not enrolled in or attending school Children who do attend may find themselves in schools that lack adequate space facilities or resources impossible situations for learning It is against this backdrop of profound need that One Laptop per Child OLPC emerged in 2005 The mission of the organization is to empower the children of developing countries to learn They created the first affordable netbook specifically built to withstand harsh climates and the handling of young children the bright green and white XO At the 2005 World Economic Forum Nicholas Negroponte the MIT researcher who co founded the Media Lab and OLPC introduced the XO laptop to the world and described a new approach to changing education in developing countries First children must have access to information through low cost data communications and the tools to educate themselves affordable computers and learning software Secondly the fundamental approach to education must shift from passive knowledge acquisition to active construction of knowledge learning how to learn Thirdly OLPC planned to build an organization with the capability to deliver these computers and support these shifts globally It was an audacious vision of how to bring about a massive educational change Learning to Change the World is the story of One Laptop per Child a story that will resonate with entrepreneurs and social innovators in any field OLPC is an example of a non profit organization with aspirations for systemic change on a global scale yet wrestling with tough questions that will be familiar to any social entrepreneur how to ensure market forces support the scale up of a social program how to balance the need to repeat past successes but still leave room for innovation how to leverage a network to expand impact beyond your original capabilities and how to help people without creating dependence The authors set out to tell the real story of their journey both successes and failures For both ardent supporters and critics alike this book presents both an invitation and a challenge to set aside preconceived notions about OLPC and read the inside story of the origins and evolution of the organization
