Mathability Michael Cain,2021-09-03 Mathability gives students the experience and ability to analyze and solve real life mathematical problems and explain their methods for arriving at the solution Mathability is an excellent resource for preparing students for the performance tasks of standards based tests The six units in this book each have 10 problems that deal with a variety of real life situations such as those at a construction site on vacation in a business and at home The open ended problems let students hone their skills in geometry probability percentages use of charts algebra number relations operations money and decimals Open ended performance tasks have become a mainstay of standards based testing It is one of the tasks that most students perform at below proficiency level Much of this low performance is due to a student s lack of experience with writing explanations of the mathematics that made it possible to solve the problem Mathability presents a systematic approach that will lead students to proficiency Within each unit this book provides four different levels of problems The Step by Step Level leads a student through the problem and provides a format for presenting their answers The Prompted Level provides the format for presenting the solution and hints on how to solve the problem The Independent Level allows students to solve and explain their answers on their own and the Challenge Level problems present a venue for gifted and talented students to push their skills to a higher level Grades 5-8

Gallagher,James C. Kaufman,2004-12-27 Females consistently score lower than males on standardized tests of mathematics yet no such differences exist in the classroom These differences are not trivial nor are they insignificant Test scores help determine entrance to college and graduate school and therefore by extension a person's job and future success If females receive lower test scores then they also receive fewer opportunities Why does this discrepancy exist This book presents a series of papers that address these issues by integrating the latest research findings and theories Authors such as Diane Halpern Jacquelynne Eccles Beth Casey Ronald Nuttal James Byrnes and Frank Pajares tackle these questions from a variety of perspectives Many different branches of psychology are represented including cognitive social personality self oriented and psychobiological The editors then present an integrative chapter that discusses the ideas presented and other areas that the field should explore **The Mathematics of Sex** Stephen J. academic achievement of African American students Boston Review The solutions offered by each essay are creative inspirational and good old common sense Los Angeles Times In 3 separate but allied essays African American scholars Theresa Perry Claude Steele and Asa Hilliard examine the alleged achievement gap between Black and white students Each author addresses how the unique social and cultural position Black students occupy in a society which often devalues and stereotypes African American identity fundamentally shapes students experience of school and sets up unique obstacles Young Gifted and Black provides an understanding of how these forces work opening the door to practical powerful methods for promoting high achievement at all levels In the first piece Theresa Perry argues that the dilemmas African American students face are rooted in the experience of race and ethnicity in America making the task of achievement distinctive and difficult Claude Steele follows up with stunningly clear empirical psychological evidence that when Black students believe they are being judged as members of a stereotyped group rather than as individuals they do worse on tests Finally Asa Hilliard argues against a variety of false theories and misguided views of African American achievement sharing examples of real schools programs and teachers around the country that allow African American students to achieve at high levels Now more than ever Young Gifted and Black is an eye opening work that has the power to not only change how we talk and think about African American student achievement but how we view the African American experience as a whole **Elementary**
