BARDACH, Charles Irvine, 1938 **The Mathematical Tourist** Ivars Peterson, 2025-05-21 In the first edition of *The Mathematical Tourist* renowned science journalist Ivars Peterson took readers on an unforgettable tour through the sometimes bizarre but always fascinating landscape of modern mathematics Now the journey continues in a new updated edition that includes all the latest information on mathematical proofs fractals prime numbers and chaos as well as new material on the relationship between mathematical knots and DNA how computers based on quantum logic can significantly speed up the factoring of large composite numbers the relationship between four dimensional geometry and physical theories of the nature of matter the application of cellular automata models to social questions and the peregrinations of virtual ants a novel mathematical model of quasicrystals based on decagon shaped tiles Blazing a trail through rows of austere symbols and dense lines of formulae Peterson explores the central ideas behind the work of professional mathematicians how and where their pieces of the mathematical puzzle fit in the sources of their ideas their fountains of inspiration and the images that carry them from one discovery to another *Mathematics Foundation Course* Open University. Mathematical Discovery Brian Thomson,Judith Bruckner,Andrew Bruckner,2011-04-28 This book is an outgrowth of classes given at the University of California Santa Barbara mainly for students who had little mathematical background Many of the students indicated they never understood what mathematics was all about beyond what they learned in algebra and geometry Was there any more mathematics to be discovered or created How could one actually discover or create new mathematics In order to give these

students some sort of answers to such questions we designed a course in which the students could actually participate in the discovery of mathematics **Mathematical Modelling** Murray S. Klamkin, 1987-01-01 Mathematics of Computing
