Algorithms for Graphics and Image Processing T. Pavlidis,2012-12-06 The technological developments of the last ten years have made computer graphics and image processing by computer popular Pictorial pattern recognition has also shown significant progress Clearly there exist overlapping interests among the three areas of research Graphic displays are of concern to anyone involved in image processing or pictorial pattern recognition and many problems in graphics require methodologies from image processing for their solutions The data structures used in all three areas are similar It seems that there is a common body of knowledge underlying all three areas pictorial information processing by computer The novelty of these fields makes it difficult to design a course or to write a book covering their basic concepts Some of the treatises on graphics focus on the hardware and methods of current interest while treatises on image processing often emphasize applications and classical signal processing The fast evolution of technology causes such material to lose its relevance For example the development of optical fibers has reduced the importance of bandwidth compression *Courses Catalog - University of Illinois at Urbana-Champaign* University of Illinois at Urbana-Champaign,2002 Includes undergraduate and graduate courses **Computerworld** ,2000-02-28 For more than 40 years Computerworld has been the leading source of technology news and information for IT influencers worldwide Computerworld s award winning Web site Computerworld com twice monthly publication focused conference series and custom research form the hub of the world s largest global IT media network **Network World** ,2002-04-22 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce *InfoWorld* ,2002-04-22 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects *Visual Basic Graphics Programming* Rod Stephens,2000 CD ROM contains More than 400 complete ready to run example programs Pictures to use with the example
