THEOREM 1(A)

The perpendicular drawn from the centre of a circle to a chord bisects the chord.

Theorem 1 in a nutshell according to the given circle sketched below:

If $OM \perp AB$ (which means that $\hat{M}_1 = \hat{M}_2 = 90^\circ$) then $AM = MB$

Given: Circle with centre O with
 $OM \perp AB$. AB is a chord

Required to prove: $AM = MB$.

Proof

Join OA and OB.

In $\triangle OAM$ and $\triangle OBM$:

- | | | | |
|-----|--|-------|--------|
| (a) | $OA = OB$ | | radii |
| (b) | $\hat{M}_1 = \hat{M}_2 = 90^\circ$ | | given |
| (c) | $OM = OM$ | | common |
| | $\therefore \triangle OAM = \triangle OBM$ | | RHS |
| | $\therefore AM = MB$ | | |

THEOREM 5

The opposite angles of a cyclic quadrilateral are supplementary (add up to 180°)
 (opp \angle 's cyclic quad)

Given: A, B, C and D are points that lie on
 the circumference of the circle
 (ABCD is a cyclic quadrilateral)

Required to prove: $\hat{A} + \hat{C} = 180^\circ$ and
 $\hat{B} + \hat{D} = 180^\circ$

Proof

Join AO and OC.

$$\hat{O}_1 = 2\hat{D} \quad \text{.....} \quad \angle \text{ at centre} = 2 \times \angle \text{ at Circumference}$$

$$\hat{O}_2 = 2\hat{B} \quad \text{.....} \quad \angle \text{ at centre} = 2 \times \angle \text{ at circumference}$$

$$\hat{O}_1 + \hat{O}_2 = 2\hat{D} + 2\hat{B}$$

$$\text{And } \hat{O}_1 + \hat{O}_2 = 360^\circ \quad \text{.....} \quad \angle \text{'s at a point}$$

$$\therefore 360^\circ = 2(\hat{D} + \hat{B})$$

$$\therefore 180^\circ = \hat{D} + \hat{B}$$

Similarly, by joining BO and DO, it can be proven that $\hat{A} + \hat{C} = 180^\circ$

Visualisation and Epistemological Access to Mathematics Education in Southern Africa Marc Schäfer, 2023-04-27 This book demonstrates that using visualisation processes in mathematics education can help to enhance teaching and learning and bridge the inequality gap that exists between well-resourced and under-resourced schools in Southern Africa. Drawing on classroom research conducted in the Southern African region, it examines how epistemological access in a context of gross inequality can be constructively addressed by providing research-based solutions and recommendations. The book outlines

the visualisation process as an integral but often overlooked process of mathematics teaching and learning It goes beyond the traditional understanding of visualisation processes such as picture forming and using tools and considers visualisation processes that are semiotic in nature and includes actions such as gestures in combination with language It adds value to the visualisation in mathematics education research discourse and deliberation in Africa With a unique focus on Southern Africa and open avenues for further research and collaboration in the region it will be a highly relevant reading for researchers academics and post graduate students of mathematics education comparative education and social justice education

Encyclopaedia of Mathematics Michiel Hazewinkel, 2013-12-01 This ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by Soviet Encyclopaedia Publishing House in five volumes in 1977 1985 The annotated translation consists of ten volumes including a special index volume There are three kinds of articles in this ENCYCLOPAEDIA First of all there are survey type articles dealing with the various main directions in mathematics where a rather fine subdivision has been used The main requirement for these articles has been that they should give a reasonably complete up to date account of the current state of affairs in these areas and that they should be maximally accessible On the whole these articles should be understandable to mathematics students in their first specialization years to graduates from other mathematical areas and depending on the specific subject to specialists in other domains of science engineers and teachers of mathematics These articles treat their material at a fairly general level and aim to give an idea of the kind of problems techniques and concepts involved in the area in question They also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions The second kind of article of medium length contains more detailed concrete problems results and techniques
