Moritz,2019-02-11 In October 2014 a group of mathematicians physicists ecologists philosophers and theologians gathered at a special conference in Berkeley California to present the results of a two year research program dubbed Project SATURN This program explored

many rich avenues of thought at the intersection of modern science and Christian theology Chief among them is the possibility that specific processes might be so complex that they do not have sufficient physical causes Known as ontological indeterminism this idea has profound implications for theology Specifically it allows God to be thought of as acting providentially within nature without violating the laws and processes of nature Such a momentous insight could influence how we understand free will natural evil suffering in nature and the relation between divine providence and human evolution The essays collected here discussed these topics and were initially presented at the 2014 conference Part I establishes the scientific basis for conceptualizing specific processes in the universe as inherently random and possibly indeterministic Part II discusses the philosophical and theological issues that spring from this understanding Together they represent the cutting edge of thought in the increasingly productive dialogue between science and theology Short for the Scientific and Theological Understandings of Randomness in Nature Project SATURN was created by the Center for Theology and the Natural Sciences a Program of the Graduate Theological Union Berkeley It was funded with a grant administered by Calvin College and provided by the John Templeton Foundation

Critical Race Theory and the Struggle at the Heart of Legal Education Paul Zwier, 2023-09-21 This book is an examination of the reception of critical race theory CRT in America's legal education system Critical race theory has been roiling legal education since the aftermath of Obama's presidency The killings of unarmed Black people fueled Black Lives Matter BLM protests in law schools which created a sense of urgency behind the plea for the law to do more to stop the killings of unarmed Black people Some BLM led protests called for faculty and administrators to be fired if they didn't act There has been an upsurge of states legislating against the teaching of CRT and law schools are struggling to respond How should legal education view CRT What are the neutral unifying values in the law that offer hope in the fight to alleviate the wave of racism that seems to continually batter law schools and society as a whole This book looks for answers and encourages the recommitment to the foundationalist beliefs of free speech equality and the due process of law

Critical Race Theory and the American Justice System Paul Zwier, 2023-02-27 When a trial lawyer stands before a jury to argue a case about a Black victim killed by a white person how should the lawyer best argue the case Critical race theorists CRTs are pessimistic that a white jury can set aside its own racism in judging the Black victim's actions and are skeptical of a jury's ability to fairly judge a white actor's motives Before the George Floyd and Ahmaud Arbery killings there was strong evidence The Innocence Project that the CRTs were right After all the prosecutors in the Ahmaud Arbery case were so convinced that a white jury in a Georgia county would not convict white vigilantes that they initially didn't even charge the killers with a crime However then back to back in both cases prosecutors prosecuted and the jury returned guilty verdicts They convicted Derrick Chauvin of murder They convicted Travis and Gregory McMichael and Roddie William Bryant of murder This book examines the how and why of these verdicts and asks whether they hold lessons vital to withstanding CRT challenges to the American justice system
