Language in the Mathematics Classroom Rachel Griffiths, Margaret Clyne, 1994

What do children's responses tell us about their understanding of mathematics How do children's interpretations of

mathematical language affect their performance What are the implications for teaching and learning Language in the Mathematics Classroom provides imaginative and varied suggestions for extending children s responses in all modes of communication spoken written graphic and active allowing them to broaden and deepen their mathematical understanding Language in the Mathematics Classroom explores the connections between mathematics and language looking at the many ways that children talk about represent and record mathematics The Mathematics Teacher's Handbook Mike Ollerton, 2009-04-10 Reading the book made me wish I could start teaching all over again It is thought provoking with lots of suggestions for new and old teachers alike I would recommend as a must to all NQT s trainees and non specialists Teresa Bird Maths teacher Burnley It has challenged the way I approach teach and even think about maths myself It is great to read a book written with such passion offering suggestions that anyone can try the next day The ideas I have tried have been really successful and provided enjoyable and sometimes memorable experiences The book makes you think and the challenge is to change not just what you are thinking but what you are actually doing in the classroom and see for yourself what effect it has on the learning taking place Zo Jagelman KS2 Teacher St Michael s CE School Bothel This comprehensive handbook provides mathematics teachers with practical advice on starting teaching in the mathematics classroom developing an effective classroom culture understanding the balance between teaching and learning mathematics Using assessment as an integral part of teaching and learning Progressing mathematical concept development This handbook is a must for every mathematics teacher Rethinking Disability and Mathematics Rachel Lambert, 2024-04-15 Every child has a right to make sense of math and to use math to make sense of their worlds Despite their gifts students with disabilities are often viewed from a deficit standpoint in mathematics classrooms These students are often conceptualized as needing to be fixed or remediated Rethinking Disability and Mathematics argues that mathematics should be a transformative space for these students a place where they can discover their power and potential and be appreciated for their many strengths Author Rachel Lambert introduces Universal Design for Learning for Math UDL Math a way to design math classrooms that empowers disabled and neurodiverse students to engage in mathematics in ways that lead to meaningful and joyful math learning The book showcases how UDL Math can open up mathematics classrooms so that they provide access to meaningful understanding and an identity as a math learner to a wider range of students Weaved throughout the book are the voices of neurodiverse learners telling their own stories of math learning Through stories of real teachers recognizing the barriers in their own math classrooms and redesigning to increase access the book Reframes students with disabilities from a deficit to an asset perspective paving the way for trusting their mathematical thinking Offers equitable math instruction for all learners including those with disabilities neurodiverse students and or multilingual learners Applies UDL to the math classroom providing practical tips and techniques to support students cognitive affective and strategic development Immerses readers in math classrooms where all students are engaged in meaningful mathematics from special education day

classes to inclusive general education classrooms from grades K 8 Integrates research on mathematical learning including critical math content such as developing number sense and place value fluency with math facts and operations and understanding fractions and algebraic thinking Explores critical issues such as writing IEP goals in math This book is designed for all math educators both those trained as general education teachers and those trained as special education teachers The UDL Math approach is adapted to work for all learners because everyone varies in how they perceive the world and in how they approach mathematical problem solving When we rethink mathematics to include multiple ways of being a math learner we make math accessible and engaging for a wider group of learners
