Child Perspectives and Children's Perspectives in Theory and Practice Dion Sommer, Ingrid Pramling Samuelsson, Karsten Hundeide, 2009-12-24 Recent decades have seen a growing emphasis in a number of professional contexts on acknowledging and acting on the views of children This trend was given added weight by the UN Convention on the Rights of the Child ratified in 1990 Today seeking the perspective of the child has become an essential process in all sorts of tasks from framing new legislation to regulating professions This book answers the fundamental question of what it is that constitutes a child perspective and how this might differ from the perspectives of children themselves The answers to such questions have important implications for building progressive and developmental adult child relationships However theoretical and empirical treatments of child perspectives and children's perspectives are very diverse and idiosyncratic and the standard reference work has yet to be written Thus this work is an attempt to fill the gap in the literature by searching for and defining key formulations of potential child perspectives within parts of the so called new child paradigm This has been derived from childhood sociology contextual relational developmental psychology interpretative humanistic psychology and developmental pedagogy The highly experienced authors develop a comprehensive professional child perspective paradigm that integrates recent theory and empirical child research With its clear presentation of underlying theories and suggested applications this book illustrates a child oriented understanding of specific relevance to both child care and preschool educational practice

Social Influences and Socialization in Infancy S. Feinman, Michael Lewis, 2013-06-29 How are we to understand the complex forces that shape human behavior A variety of diverse perspectives drawing on studies of human behavioral ontogeny as well as humanity's evolutionary heritage seem to provide the best likelihood of success It is in an attempt to synthesize such potentially disparate approaches to human development into an integrated whole that we undertake this series on the genesis of behavior In many respects the incredible burgeoning of research in child development over the last two decades or so seems like a thousand lines of inquiry spreading outward in an incoherent starburst of effort The need exists to provide on an ongoing basis an arena of discourse within which the threads of continuity among those diverse lines of research on human development can be woven into a fabric of meaning and understanding Scientists scholars and those who attempt to translate their efforts into the practical realities of the care and guidance of infants and children are the audience that we seek to reach Each requires the opportunity to see to the degree that our knowledge in given areas permits various aspects of development in a coherent integrated fashion It is hoped that this series which brings together research on infant biology

developing infant capacities animal models and impact of social cultural and familial forces on development and the distorted products of such forces under certain circumstances serves these important social and scientific needs

Early Social Interaction Michael A. Forrester, 2015 This book considers how a young child becomes a member of culture through the practices and procedures of everyday conversation

Children's Rights 0-8 Mallika Kanyal, 2014-03-26 Children's Rights explores the relevance of children's participatory rights in education particularly at a time when there are competing demands in meeting the rigid curriculum frameworks whilst taking into account children's entitlement to participate in matters affecting their lives It engages with theoretical and practical models of participation with an aim to support reflective practice The chapters are informed by wider academic debates and examples from research and everyday practice in early year settings making it an accessible read for students practitioners as well as researchers

Women's Faith Development Nicola Slee, 2021-11-18 Presenting a rich account of women's faith lives and mapping women's meanings in their own right this book offers an alternative to dominant accounts of faith development which failed to account for women's experience Drawing on Fowler's faith development theory feminist models of women's faith and social science methodology the text explores the patterns and processes of women's faith development and spirituality in a group of thirty women belonging to or on the edges of Christian tradition Integrating practical theological concern with Christian education and pastoral practice this book will be of interest to all concerned with women's faith development spirituality education and formation and those working in the fields of practical theology pastoral care adult theological education spiritual direction and counselling
