ways Bach's music cross pollinates with contemporary composer performers John Lewis and the Modern Jazz Quartet and keyboardist Bernie Worrell and Parliament Funkadelic. The diverse contexts illuminate a broad range of parody techniques from structural scaffolding and contrapuntal elaboration to integration with stylistic languages far removed from the Baroque. An insightful look at how composers build on each other's work. *Bach Reworked* reveals how nuanced understandings of parody procedures can fuel both musical innovation and historically informed performance. **The Formula** Luke Dormehl, 2014-04-03. What if everything in life could be reduced to a simple formula? What if numbers were able to tell us which partners we were best matched with, not just in terms of attractiveness but for a long-term committed marriage? Or if they could say which films would be the biggest hits at the box office and what changes could be made to those films to make them even more successful? Or even who out of us is likely to commit certain crimes and when? This may sound like the world of science fiction, but in fact it is just the tip of the iceberg in a world that is increasingly ruled by complex algorithms and neural networks. In *The Formula*, Luke Dormehl takes you inside the world of numbers, asking how we came to believe in the all-conquering power of algorithms, introducing the mathematicians, artificial intelligence experts, and Silicon Valley entrepreneurs who are shaping this brave new world and ultimately asking how we survive in an era where numbers can sometimes seem to create as many problems as they solve.

**Women's Music for the Screen** Felicity Wilcox, 2021-08-26. *Women's Music for the Screen: Diverse Narratives in Sound* shines a long overdue light on the works and lives of female identifying screen composers. Bringing together composer profiles, exclusive interview excerpts, and industry case studies, this volume showcases their achievements and reflects on the systemic gender biases women have faced in an industry that has long excluded them. Across 16 essays, an international array of contributors present a wealth of research, data, biographical content, and musical analysis of film, television, and video game scores to understand how the industry excludes women, the consequences of these deficits, and why such inequities persist, and to document women's rich contributions to screen music in diverse styles and genres. The chapters amplify the voices of women composers, including Bebe Barron, Delia Derbyshire, Wendy Carlos, Anne Dudley, Rachel Portman, Hildur Guðnadóttir, Mica Levi, Winifred Phillips, and more. From the mid-twentieth century to the present and from classic Hollywood scores to pioneering electronic music, these are the stories and achievements of the women who have managed to forge successful careers in a male-dominated arena. Suitable for researchers, educators, and students alike, *Women's Music for the Screen* urges the screen music industry to consider these sounds and stories in a way it hasn't before, as voices that more accurately reflect the world we all share.
