*Masters of the Ocean Realm* John Edward Heyning, 1995-01 *Masters of the Ocean Realm* is a colorful accessible introduction to the cetaceans that shows how scientists study elusive creatures and reveals what they have learned The book gives examples of the interaction of whales dolphins and porpoises with human cultures around the world and discusses such conservation issues as modern whaling habitat degradation pollution and the threat of extinction Short essays address additional topics such as whale intelligence the mystery of mass strandings the lessons of DNA analysis and the tuna dolphin controversy The book features numerous color illustrations including images by leading nature photographers as well as a glossary of unfamiliar terms

**Invitation to Oceanography** Paul R. Pinet, 2008-12-19 *Battleground: Environment* Robin Morris Collin, 2008-07-30 The environment inflames passions in people on all points of the political spectrum Controversies over such issues as the rise of cancer in industrialized countries climate change and urban sprawl have skyrocketed as we recognize the impact that humans have on the environment Many people become immersed in these controversies at a local level before they know much about the topic the nuances of many environmental conflicts are often overlooked as the media focuses on the adversarial nature of the conflict This reference resource provides students teachers librarians and citizens as a whole with the necessary first step in understanding these hot button issues Each entry identifies the issue involved who was holding various points of view or positions where and when the conflict occurred and explains the cultural social and political context and dimensions of the conflict *Battleground Environment* provides in depth analysis of over 100 of the most controversial topics involving the environment including childhood asthma the Kyoto Summit and Treaty smart growth the Three Gorges Dam in China and genetically modified food Entries include descriptions of public policies and discussions of the future of the controversy Each entry concludes with cross references and a short relevant bibliography suitable for student research The resource includes numerous sidebars that discuss in detail particular local controversies that illuminate the complexity of the topics discussed

**Sensory Exotica** Howard C. Hughes, 2001-02-23 An entertaining guide to the exotic sensory abilities of the Earth's nonhuman creatures Certain insects and animals such as bees birds bats fish and dolphins possess senses that lie far beyond the realm of human experience Examples include echolocation internal navigation systems and systems based on bioelectricity In this book Howard C Hughes tells the story of these exotic senses He tells not only what has been discovered but how it was discovered including historical misinterpretations of animal perception that we now view with amusement The book is divided into four parts biosonar biological compasses electroperception and chemical communication Although it is filled with fascinating descriptions of animal sensitivities the sonar system of a bat for example rivals that of the most sophisticated human made devices the author's goal is to explain the anatomical and physiological principles that underlie them Knowledge of these mechanisms has practical applications in areas as diverse as marine navigation the biomedical sciences and nontoxic pest control It can also help us to obtain a deeper

understanding of more familiar sensory systems and the brain in general Written in an entertaining accessible style the book recounts a tale of wonder that continues today for who knows what sensory marvels still await discovery or what kind of creatures will provide the insights
