Hacking Cyberspace David J. Gunkel,2018-02-19 In *Hacking Cyberspace* David J Gunkel examines the metaphors applied to new technologies and how those metaphors inform shape and drive the implementation of the technology in question The author explores the metaphorical tropes that have been employed to describe and evaluate recent advances in computer technology telecommunications systems and interactive media Taking the stance that no speech is value neutral Gunkel examines such metaphors as the information superhighway and the electronic frontier for their political and social content and he develops a critical investigation that not only traces the metaphors conceptual history but explicates their implications and consequences for technological development Through *Hacking Cyberspace* David J Gunkel develops a sophisticated understanding of new technology that takes into account the effect of technoculture's own discursive techniques and maneuvers on the actual form of technological development

Cyberfutures Ziauddin Sardar,Jerome R. Ravetz,1996-08 On the age of Internet

Criminal Psychology and Forensic Technology Grover Maurice Godwin,2000-11-29 Offender profiling has been developing slowly as a possible investigative tool since 1841 and the publication of Edgar Allen Poe's *The Murder in the Rue Morgue* In this book detective C Auguste Dupin demonstrates the ability to follow the thought patterns of a companion while they stroll through Paris for 15 minutes without speaking a word Today

White Noise A. Calcutt,1998-10-29 Transcending recent attempts to pigeonhole the information revolution this book shows how the paradoxical aspects of new media and the Internet is it masculine or feminine Does it mean peace or war are the peculiarly intense expression of the contradictions underlying our whole society Andrew Calcutt is an enthusiastic champion of the potential for new communications technology and a trenchant critic of the culture of fear which prevents its realisation

Cyberpop Sidney Eve Matrix,2013-05-13 *Cyberpop* is an analysis of cyberculture and its popular cultural productions The study begins with a Foucaultian model of cyberculture as a discursive formation and explains how some key concepts such as virtuality speed and Connectivity operate as a conceptual architecture network linking technologies to information and individual subjects The chapters then each focus on a particular cyberfiguration including Hollywood films *GATTACA* The Matrix popular literature William Gibson's *Neuromancer* Scott Westerfeld's *Polymorph* advertising for digital products and services Apple Computer's 1984 McIntosh campaign AT T's mLife campaign digital artworks including virtual females such as Motorola's Mya and Elite Modeling Agency's Webbie Tookay and work by visual artist Daniel Lee for

Microsoft's Evolution campaign and video games Tomb Raider Each close reading illustrates the ways in which representations of digital lifestyles and identities which typically fetishize computers and celebrate a high tech aesthetic encourage participation in digital capitalism and commodity cyberculture Matrix argues that popular representations of cyberculture often function as forms of social criticism that creatively inspire audiences to think different in the words of Mac advertising about the consequences of the digitalization of everyday life

Hackers Paul A. Taylor, 1999 The practice of computer hacking is increasingly being viewed as a major security dilemma in Western societies by governments and security experts alike Using a wealth of material taken from interviews with a wide range of interested parties such as computer scientists security experts and hackers themselves Paul Taylor provides a uniquely revealing and richly sourced account of the debates that surround this controversial practice By doing so he reveals the dangers inherent in the extremes of conciliation and antagonism with which society reacts to hacking and argues that a new middle way must be found if we are to make the most of society's high tech meddlers

Hackers Paul Taylor, 2012-11-12 The practice of computer hacking is increasingly being viewed as a major security dilemma in Western societies by governments and security experts alike Using a wealth of material taken from interviews with a wide range of interested parties such as computer scientists security experts and hackers themselves Paul Taylor provides a uniquely revealing and richly sourced account of the debates that surround this controversial practice By doing so he reveals the dangers inherent in the extremes of conciliation and antagonism with which society reacts to hacking and argues that a new middle way must be found if we are to make the most of society's high tech meddlers

Hacked, Attacked & Abused Peter Lilley, 2002 International research has concluded that one of the largest risks to any business now comes from criminal attacks on their technology The business world is totally dependent on technology yet in many cases the users of such technology are ignorant of the risks inherent in it The sheer number of recent hacker attacks and the incidence of Internet viruses demonstrate how prevalent such action is becoming and how susceptible business is to it This work is an investigation into all these known technological risk areas and a non technical evaluation of the problem with numerous real examples of electronic crime and fraud It also delivers practical specific advice on how to identify and prevent electronic crime

Respawn Colin Milburn, 2018-12-14 Colin Milburn examines the relationships between video games hackers and science fiction showing how games provide models of social and political engagement critique and resistance while offering a vital space for players and hacktivists to challenge centralized power and experiment with alternative futures

Critical Information Infrastructures Maitland Hyslop, 2007-09-05 Resilience is an increasingly important concept and quality in today's world It is particularly important in the area of Critical Infrastructures It is crucial in the area of Critical Information Infrastructure This is because since the year 2000 man has been dependent on information and telecommunications systems for survival particularly in the Organization for Economic Cooperation and Development OECD countries and because all other Critical Infrastructures

depend upon to a greater or lesser extent Critical Information 1 2 Infrastructure Until probably the late 1980s it would be fair to say that the defense of individual nation states depended upon a mixture of political will and armed might The fall of the Berlin Wall may have effectively ended the Cold War and with it a bipolar world but it brought globalization and a multipolar digital world in its wake Simply put a number of power vacuums were created and these have yet to be fully filled and settled In this New World many changes were afoot These changes include the increasing irrelevance of nation states in federated structures and the export of democracy on the back of globalization One of the biggest changes though is the use of digital technology by the OECD countries This is on such a scale that these countries have become both dependent upon information technology and as individual 3 states largely irrelevant to the new global electronic economy 1 This adaptation of Maslow's hierarchy of needs is attributed to KPMG

Cybercrime Through an Interdisciplinary Lens Thomas Holt, 2016-12-08 Research on cybercrime has been largely bifurcated with social science and computer science researchers working with different research agendas These fields have produced parallel scholarship to understand cybercrime offending and victimization as well as techniques to harden systems from compromise and understand the tools used by cybercriminals The literature developed from these two fields is diverse and informative but until now there has been minimal interdisciplinary scholarship combining their insights in order to create a more informed and robust body of knowledge This book offers an interdisciplinary approach to research on cybercrime and lays out frameworks for collaboration between the fields Bringing together international experts this book explores a range of issues from malicious software and hacking to victimization and fraud This work also provides direction for policy changes to both cybersecurity and criminal justice practice based on the enhanced understanding of cybercrime that can be derived from integrated research from both the technical and social sciences The authors demonstrate the breadth of contemporary scholarship as well as identifying key questions that could be addressed in the future or unique methods that could benefit the wider research community This edited collection will be key reading for academics researchers and practitioners in both computer security and law enforcement This book is also a comprehensive resource for postgraduate and advanced undergraduate students undertaking courses in social and technical studies

A Socio-Legal Study of Hacking Michael Anthony C. Dizon, 2017-12-01 The relationship between hacking and the law has always been complex and conflict ridden This book examines the relations and interactions between hacking and the law with a view to understanding how hackers influence and are influenced by technology laws and policies In our increasingly digital and connected world where hackers play a significant role in determining the structures configurations and operations of the networked information society this book delivers an interdisciplinary study of the practices norms and values of hackers and how they conflict and correspond with the aims and aspirations of hacking related laws Describing and analyzing the legal and normative impact of hacking as well as proposing new approaches to its regulation and governance this book makes an essential contribution to understanding the socio technical changes and consequent legal challenges faced by our contemporary connected society

Social Engineering Robert W. Gehl, Sean T. Lawson, 2022-03-08 Manipulative communication from early twentieth century propaganda to today's online con artistry examined through the lens of social engineering The United States is awash in manipulated information about everything from election results to the effectiveness of medical treatments Corporate social media is an especially good channel for manipulative communication with Facebook a particularly willing vehicle for it In *Social Engineering* Robert Gehl and Sean Lawson show that online misinformation has its roots in earlier techniques mass social engineering of the early twentieth century and interpersonal hacker social engineering of the 1970s converging today into what they call masspersonal social engineering As Gehl and Lawson trace contemporary manipulative communication back to earlier forms of social engineering possibilities for amelioration become clearer The authors show how specific manipulative communication practices are a mixture of information gathering deception and truth indifferent statements all with the instrumental goal of getting people to take actions the social engineer wants them to Yet the term fake news they claim reduces everything to a true false binary that fails to encompass the complexity of manipulative communication or to map onto many of its practices They pay special attention to concepts and terms used by hacker social engineers including the hacker concept of bullshitting which the authors describe as a truth indifferent mix of deception accuracy and sociability They conclude with recommendations for how society can undermine masspersonal social engineering and move toward healthier democratic deliberation
