

When $x \geq 0$, $|x| = x$, so it is not true that $|x| > x$. However, when $x < 0$, $|x| = -x$. This means x is negative and $|x|$ is positive, and since any positive number is greater than any negative number, $|x| > x$ when $x < 0$.

Question: 6

Consider the following graphic showing demographics of a high school with 1219 total students:

Which of these is the least quantity?

- The average number of Black students in the 9th and 10th grades
- The number of Asian female students at the school
- The difference in the number of male and female students at the school
- The difference in the number of 10th and 12th grade students at the school

Answer: B

Explanation:

The difference in the number of male and female students at the school is $630 - 589 = 41$, and the difference in the number of 9th and 12th grade students at the school is $327 - 255 = 72$. There are approximately 38 Asian females at the school (0.06×630). The average number of black students is more than 90 (30% of 300) because there are more than 90 in the 10th grade and the class is smaller than the 9th grade group.

Question: 7
