

## GRADE 7 MATH LEARNING GUIDE

### Lesson 26: Solving Linear Equations and Inequalities in One Variable Using Guess and Check Time: 1 hour

**Prerequisite Concepts:** Evaluation of algebraic expressions given values of the variables

**About the Lesson:** This lesson will deal with finding the unknown value of a variable that will make an equation true (or false). You will try to prove if the value/s from a replacement set is/are solution/s to an equation or inequality. In addition, this lesson will help you think logically via guess and check even if rules for solving equations are not yet introduced.

#### **Objective:**

In this lesson, you are expected to:

1. Differentiate between mathematical expressions and mathematical equations.
2. Differentiate between equations and inequalities.
3. Find the solution of an equation and inequality involving one variable from a given replacement set by guess and check.

#### **Lesson Proper:**

##### **I. Activity**

A mathematical expression may contain variables that can take on many values. However, when a variable is known to have a specific value, we can substitute this value in the expression. This process is called *evaluating a mathematical expression*. Instructions: Evaluate each expression under Column A if  $x = 2$ . Match it to its value under Column B and write the corresponding letter on the space before each item. A passage will be revealed if answered correctly.
