

8th Grade – Summer Math Packet

Domain: EXPRESSIONS & EQUATIONS

CCRS Standards:

7 – Apply properties of operations as strategies to add, subtract, factor, and expand linear expressions with rational coefficients.

Objective: Use the distributive property to generate equivalent expressions.

The **distributive property** of multiplication over addition states: $a(b + c) = a \cdot b + a \cdot c$ or $a(b + c) = ab + ac$.

The same is true for subtraction: $a(b - c) = a \cdot b - a \cdot c$ or $a(b - c) = ab - ac$.

Examples:

$$1. \quad -3(-2x + 5) = (-3) \cdot -2x + (-3) \cdot 5 \quad \text{Distribute 3 through the parentheses; Multiply } -3 \text{ by } -2x \text{ \& multiply } -3 \text{ by } 5. \\ = 6x - 15 \quad \text{Simplify}$$

$$2. \quad 4(5a - 9b) = 4 \cdot 5a - 4 \cdot 9b \quad \text{Distribute 4 through the parentheses; Multiply 4 by } 5a \text{ and multiply 4 by } 9b. \\ = 20a - 36b$$

1. Use the distributive property to write an equivalent expression.

$$-2(n + 7)$$

2. Use the distributive property to write an equivalent expression.

$$-8(3p - 1)$$

3. Use the distributive property to write an equivalent expression.

$$7(-4m + 5)$$

4. Use the distributive property to write an equivalent expression.

$$11(-x - 5)$$

5. Use the distributive property to write an equivalent expression.

$$-(-3k - 4)$$

6. Use the distributive property to write an equivalent expression.

$$-6(5z + 12)$$

Math Packet For 8th Grade 2013:

District Leadership for Racial Equity Larkin Willis, Desiree Carver-Thomas, Linda Darling-Hammond, 2025-07-30

District Leadership for Racial Equity shows how transformative changes can occur across diverse districts when leaders take purposeful action in support of racial equity. Developed as part of the Racial Equity Leadership Network initiative led by Southern Education Foundation, this collection provides an opportunity for leaders to learn from district reform efforts that have reduced disparities and improved outcomes for students of color across unique contexts. The cases presented acknowledge the challenges leaders face but they also demonstrate that change is possible when leaders build will and capacity to support successful student outcomes. It examines the cases of racial equity leaders across four districts who have developed approaches that create new opportunities and outcomes for students who have been historically marginalized. District Leadership for Racial Equity is an essential resource for emerging leaders, leader practitioners, and policymakers who are committed to reducing disparities and improving outcomes for all students, especially those who are marginalized and underserved in our schools and society. 2024 For 2024 Exam How Math Works G. Arnell Williams, 2013-04-04 We hear all the time how American children are falling behind their global peers in various basic subjects but particularly in math Is it our fear of math that constrains us Or our inability to understand math's place in relation to our everyday lives How can we help our children better understand the basics of arithmetic if we're not really sure we understand them ourselves Here G Arnell Williams helps parents and teachers explore the world of math that their elementary school children are learning Taking readers on a tour of the history of arithmetic and its growth into the subject we know it to be today Williams explores the beauty and relevance of mathematics by focusing on the great conceptual depth and genius already inherent in the elementary mathematics familiar to us all and by connecting it to other well known areas such as language and the conceptual aspects of everyday life The result is a book that will help you to better explain mathematics to your children For those already well versed in these areas the book offers a tour of the great conceptual and historical facts and assumptions that most simply take for granted If you are someone who has always struggled with mathematics either because you couldn't do it or because you never really understood why the rules are the way they are if you were irritated with the way it was taught to you with the emphasis being only on learning the rules and recipes by rote as opposed to obtaining a good conceptual understanding then *How Math Works* is for you
