Muschla,Gary R. Muschla,Erin Muschla,2010-03-08 Classroom tested strategies to help new and experienced math teachers thrive Math teachers must not only instruct their students in basic mathematical skills and concepts they must also prepare them for standardized tests provide instruction in the use of technology and teach problem solving and critical thinking skills At the same time they must also manage their other responsibilities taking attendance planning grading record keeping disciplining and communicating with parents and administrators This book provides efficient and practical information on the management skills necessary to succeed in this most challenging profession Offers realistic suggestions and strategies for planning and delivering effective math instruction Helps math teachers achieve excellence and continue to be enthusiastic and successful in their teaching careers Includes reproducible forms to help math teachers stay on top of everything they need to do The Math Teacher s Survival Guide contains a wealth of useful tools and strategies that can help any math teacher succeed in the classroom Pedagogy in a New Tonality Peter Gouzouasis,2012-01-01 This is a book for teachers by teachers from elementary school to university level classrooms It is about the use of creative instructional strategies in K 12 classroom settings and the transformations the teachers made in their journeys from being traditional practitioners to becoming pedagogical in their approaches to teaching and learning across the curriculum Over twenty teachers conducted research in their classrooms on the implementation of creative strategies tactics graphics organizers and visual journals in teaching and learning They have written their inquiries in a narrative style informed by various forms of arts based educational research Their research is approachable and usable by other teachers who are interested in becoming reflective reflexive practitioners Many of the strategies tactics and graphics organizers are described by Barrie Bennett in his widely used textbook Beyond Monet The Artful Science of Instructional Intelligence However through their journeys of becoming teacher learner researchers many discovered

numerous creative variations of Bennett's work as it was implemented in their classrooms. While there are many professional books that provide ideas on collaborative learning and creative teaching approaches, there is very little published research on the efficacy of these concepts in the K-12 classroom. These inquiries provide practical insights into how inspired teachers can conduct research on improving their own practice as well as on greatly improving their students' learning. Thus, this book has widespread interest for teachers and administrators who seek to implement systemic changes in the ways that teachers teach and children learn in the 21st century.

Assessing Disciplinary Writing in Both Research and Practice Wright, Katherine Landau, Hodges, Tracey S., 2023-08-01 Assessing Disciplinary Writing in Both Research and Practice tackles the challenge of measuring writing skills in specific content areas, which is crucial for preparing students to communicate as field experts and for their future careers. Edited by Katherine Wright, Associate Professor of Literacy and Language at Boise State University, and Tracey Hodges, Founder and Lead Consultant of The Empowering Advocate, this book provides solutions by bringing together validated measures and practical assessment strategies that can be used in both research and instruction. The book's theoretical foundations cover multimodal disciplinary writing, assessing disciplinary writing versus content area writing, and using assessment as a tool for disciplinary writing instruction. Practical methods for assessing writing in social studies, science, mathematics, English, and language arts, and other genres at the elementary, middle, and high school levels are included, as well as assessment strategies for specific populations of students such as undergraduate students, English learners, gifted and talented students, special needs students, and incarcerated students. This highly valued reference is essential for academic scholars, K-12 teachers, and educational researchers who want to improve writing instruction and research in content and discipline-specific areas. By providing validated measures and methods for assessing disciplinary writing, this edited book helps bridge the gap between research and practice and enables practitioners to better measure student growth and improve writing instruction. This publication is the first step towards advancing research and improving writing instruction in content and discipline-specific areas.

Marvelous Minilessons for Teaching Nonfiction Writing K-3 Lori Jamison Rog, 2015-12-11 Today's young learners know more about their world than ever before. This remarkable book shows that even our youngest writers can consider audience and purpose as they use nonfiction writing to document their ideas and share those ideas with others. But if students are going to be able to use writing to learn, they must have opportunities for learning to write. That's what this book is for. A wealth of hands-on minilessons offer strategies for writing informational, persuasive, and procedural text. Each lesson starts with a learning goal and follows an I do, we do, you do format. Teachers will find a wealth of ideas for guiding young students to write about what they know and care about.
