Christian Higher Education David S. Dockery, Christopher W. Morgan, 2018-12-10 Our world is growing increasingly complex and confused a unique and urgent context that calls for a grounded and fresh approach to Christian higher education Christian higher education involves a distinctive way of thinking about teaching learning scholarship curriculum student life administration and governance that is rooted in the historic Christian faith In this volume twenty nine experts from a variety of fields including theology the humanities science mathematics social science philosophy the arts and professional programs explore how the foundational beliefs of Christianity influence higher education and its disciplines Aimed at equipping the next generation to better engage the shifting cultural context this book calls students professors trustees administrators and church leaders to a renewed commitment to the distinctive work of Christian higher education for the good of the society the good of the church and the glory of God *Abraham's Dice* Karl Giberson, 2016 Most of us believe everything happens for a reason Whether it is God's will karma or fate we want to believe that nothing in the world especially disasters and tragedies is a random meaningless event But now as never before confident scientific assertions that the world embodies a profound contingency are challenging theological claims that God acts providentially in the world The random and meandering path of evolution is widely used as an argument that God did not create life Abraham's Dice explores the interplay between chance and providence in the monotheistic religious traditions looking at how their interaction has been conceptualized as our understanding of the workings of nature has changed This lively historical conversation has generated intense ongoing theological debates and provocative responses from science what are we to make of the history of our universe where chance and law have played out in complex ways Or the evolution of life where random mutations have challenged attempts to find purpose within evolution and convinced many that human beings are but a glorious accident The enduring belief that everything happens for a reason is examined through a conversation with major scholars among them holders of prestigious chairs at Oxford and Cambridge Universities and the University of Basel as well

as several Gifford lecturers and two Templeton prize winners Organized historically Abraham s Dice provides a wide ranging scientific theological and biblical foundation to address the question of providence and divine action in a world shot through with contingency

Varieties of Integration C. Ray

Rosentrater,2015-11-16 *Varieties of Integration* explores the critical contributions by Riemann Darboux Lebesgue Henstock Kurzweil and Stieltjes to the theory of integration and provides a glimpse of more recent variations of the integral such as those involving operator valued measures By the first year of graduate school a young mathematician will have encountered at least three separate definitions of the integral The associated integrals are typically studied in isolation with little attention paid to the relationships between them or to the historical issues that motivated their definitions *Varieties of Integration* redresses this situation by introducing the Riemann Darboux Lebesgue and gauge integrals in a single volume using a common set of examples This approach allows the reader to see how the definitions influence proof techniques and computational strategies Then the properties of the integrals are compared in three major areas the class of integrable functions the convergence properties of the integral and the best form of the Fundamental Theorems of Calculus

Becoming a Christian Ola Hossjer,2018-02-21 What influences the decision to become a Christian In the seventeenth century the famous scientist Blaise Pascal viewed this as a game with truth our adversary Pascal argued that we are in the game whether we like it or not Christianity is either true or not and we have to weigh the two alternatives According to Pascal s Wager we have everything to win and nothing to lose by taking a leap of faith and becoming a Christian In this book Ola H ssjer extends Pascal s Wager and argues that we respond to the Christian message very differently There are three main attitudes among people the first group follows Pascal s advice even if evidence before the decision is incomplete the second group requires convincing evidence at first and members of the third group will not become Christians regardless of evidence H ssjer contends that the decision consists of three components a religious disposition from birth evidence and a willingness to act Although we weigh evidence and will differently our priorities may change after a life crisis so that we either reevaluate evidence or become more positive toward Christianity This is illustrated by a number of people who became Christians

The Truth in Both Extremes Robert S. Rayburn,2022-01-28 A phenomenon of biblical revelation that has provoked unending confusion and controversy is the penchant of the biblical writers to make assertions clear and intelligible in themselves that seem inconsistent with if not the virtual contradiction of assertions made elsewhere in the same Bible What is more the Bible essentially never acknowledges the paradoxes and never seeks to explain or resolve them Readers of the Bible encounter such contradictions at every turn in its theology its description of Christian experience and its ethical teaching These unreconciled emphases lie beneath the

theological disagreements that have long separated Christians from one another Therefore coming to terms with this feature of biblical communication is of great importance While the existence of these many paradoxes in the Bible has long been recognized rarely have Christians been taught to expect them or what to do when confronted with them This brilliant feature of the biblical pedagogy is an accommodation to the limitations of the human intellect serves to grant us access to the truth so far as we can comprehend it forces us to face facts we would otherwise prefer to ignore and makes of Christians themselves a unique complex of opposites
