Contemporary Research and Perspectives on Early Childhood Mathematics Education Iliada Elia,Joanne Mulligan,Ann Anderson,Anna Baccaglini-Frank,Christiane Benz,2018-02-21 This book brings together a collection of research based papers on current issues in early childhood mathematics education that were presented in the Topic Study Group 1 TSG 1 at the 13th International Congress on Mathematical Education ICME 13 held at the University of Hamburg in 2016 It will help readers understand a range of key issues that early childhood mathematics educators encounter today Research on early childhood mathematics education has grown in recent years due in part to the well documented positive relation between children s early mathematical knowledge and their later mathematics learning and to the considerable emphasis many countries are now placing on preschool education The book addresses a number of central questions including What is mathematical structural development and how can we promote it in early childhood How can multimodality and embodiment contribute to early mathematics learning and to acquiring a better understanding of young children s mathematical development How can children s informal mathematics related experiences affect instruction and children s learning in different mathematics content areas What is the role of tools including technology and picture books in supporting early mathematics learning What are the challenges in early childhood mathematics education for teachers education and professional development

*Financial Literacy Education* Asta Zokaityte,2017-06-26 This book explores the issue of consumer financial education responding to increased interest in and calls to improve peoples financial literacy skills and abilities to understand and manage their money New conceptual frameworks introduced in the book offer academic audiences an innovative way of thinking about the project on financial literacy education Using the concepts of education regulation and financial knowledge democratisation to analyse the financial education project in the UK the book exposes serious and often ignored limitations to using information and education as tools for consumer protection It challenges the mainstream representation of financial literacy education as a viable solution to consumer financial exclusion and poverty Instead it argues that the project on financial literacy education fails to acknowledge important dependences between consumer financial behaviour and the socio economic political and cultural context within which consumers live Finally it reveals how these international and national calls for ever greater financial education oversimplify and underestimate the complexity of consumer financial decision making in our modern times

offers an extensive expert analysis of a school system that bears the legacy hallmarks and consequences that lie at the intersection of race and education Urban education scholar Camika Royal deftly analyzes decades of efforts aimed at improving school performance within the School District of Philadelphia SDP in a brisk survey spanning every SDP superintendency from the 1960s through 2017 Royal interrogates the history of education and educational reforms recounting city state and federal interventions She covers SDP s connections with the Common School Movement and the advent of the Philadelphia Freedom Schools and she addresses federal policy shifts from school desegregation to the No Child Left Behind and Every Student Succeeds Acts Her survey provides sociopolitical context and rich groundwork for a nuanced examination of why many large urban districts struggle to implement reforms with fidelity and in ways that advance Black students academically and holistically In a bracing critique Royal bears witness to the ways in which positive public school reform has been obstructed through racism and racial capitalism but also via liberal ideals neoliberal practices and austerity tactics Royal shows how despite the well intended actions of larger entities the weight of school reform here as in other large urban districts has been borne by educators striving to meet the extensive needs of their students families and communities with only the slightest material financial and human resources She draws on the experiences of Black educators and community members and documents their contributions Not Paved for Us highlights the experiences of Black educators as they navigate the racial and cultural politics of urban school reform Ultimately Royal names dissects and challenges the presence of racism in school reform policies and practices while calling for an antiracist future

**Stochastic Computing: Techniques and Applications** Warren J. Gross, Vincent C. Gaudet, 2019-02-18 This book covers the history and recent developments of stochastic computing Stochastic computing SC was first introduced in the 1960s for logic circuit design but its origin can be traced back to von Neumann s work on probabilistic logic In SC real numbers are encoded by random binary bit streams and information is carried on the statistics of the binary streams SC offers advantages such as hardware simplicity and fault tolerance Its promise in data processing has been shown in applications including neural computation decoding of error correcting codes image processing spectral transforms and reliability analysis There are three main parts to this book The first part comprising Chapters 1 and 2 provides a history of the technical developments in stochastic computing and a tutorial overview of the field for both novice and seasoned stochastic computing researchers In the second part comprising Chapters 3 to 8 we review both well established and emerging design approaches for stochastic computing systems with a focus on accuracy correlation sequence generation and synthesis The last part comprising Chapters 9 and 10 provides insights into applications in machine learning and error control coding

**Women After All** Melvin Konner, 2015-03-02 A sparkling thought provoking account of sexual differences Whether you re a man or a woman you ll find his conclusions gripping Jared Diamond There is a human genetic fluke that is surprisingly common due to a change in a key pair of chromosomes In the normal condition the two look the same but in this disorder one is malformed and shrunk

beyond recognition The result is a shortened life span higher mortality at all ages an inability to reproduce premature hair loss and brain defects variously resulting in attention deficit hyperactivity conduct disorder hypersexuality and an enormous excess of both outward and self directed aggression It is called maleness Melvin Konner traces the arc of evolution to explain the relationships between women and men With patience and wit he explores the knotty question of whether men are necessary in the biological destiny of the human race He draws on multiple colorful examples from the natural world such as the mating habits of the octopus black widow angler fish and jacana and argues that maleness in humans is hardly necessary to the survival of the species In characteristically humorous and engaging prose Konner sheds light on our biologically different identities while noting the poignant exceptions that challenge the male female divide We meet hunter gatherers such as those in Botswana whose culture gave women a prominent place invented the working mother and respected women's voices around the fire Recent human history has upset this balance as a dense world of war fostered extreme male dominance But our species has been recovering over the past two centuries and an unstoppable move toward equality is afoot It will not be the end of men but it will be the end of male supremacy and a better wiser world for women and men alike
