Maths Memo June 2013:

Caught in the Act Cyril Julie, Lorna Holtman, Charles R. Smith, 2019-12-11 The research reported in Caught in the Act draws together the insights gained from a continuous professional development initiative for high school mathematics teachers teaching in low socio economic status and socially challenged environments in South Africa The chapters show the possibilities for enhancing achievement in school mathematics if a strength based approach is adopted to develop teaching with teachers and when their concerns are taken seriously The book demonstrates that the ecological relevance fitness for the context in which teachers are teaching of the goods developed and distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education The book is of interest to mathematics teachers school leaders mathematics curriculum advisors policy makers and researchers **An Excursion**

Through Discrete Differential Geometry American Mathematical Society. Short Course, Discrete Differential Geometry, 2020-09-02 Discrete Differential Geometry DDG is an emerging discipline at the boundary between mathematics and computer science It aims to translate concepts from classical differential geometry into a language that is purely finite and discrete and can hence be used by algorithms to reason about geometric data In contrast to standard numerical approximation the central philosophy of DDG is to faithfully and exactly preserve key invariants of geometric objects at the discrete level This process of translation from smooth to discrete helps to both illuminate the fundamental meaning behind geometric ideas and provide useful algorithmic guarantees This volume is based on lectures delivered at the 2018 AMS Short Course Discrete Differential Geometry held January 8 9 2018 in San Diego California The papers in this volume illustrate the principles of DDG via several recent topics discrete nets discrete differential operators discrete mappings discrete conformal geometry and discrete optimal transport *A Complete Classification of the Isolated Singularities for Nonlinear Elliptic Equations with Inverse Square Potentials* Florica C. Cîrstea, 2014-01-08 In particular for $b = 1$ and 0 we find a sharp condition on h such that the origin is a removable singularity for all non negative solutions of $\Delta u = h|u|^{p-2}u$ thus addressing an open question of Vázquez and Vron *Singularity Theory for Non-Twist KAM Tori* A. González-Enríquez, A. Haro, R. de la Llave, 2014-01-08 In this monograph the authors introduce a new method to study bifurcations of KAM tori with fixed Diophantine frequency in parameter dependent Hamiltonian systems It is based on Singularity Theory of critical points of a real valued function which the authors call the potential The potential is constructed in such a way that nondegenerate critical points of the potential correspond to twist invariant tori i.e. with nondegenerate torsion and degenerate critical points of the potential correspond to non twist invariant tori Hence bifurcating points correspond to non twist tori **Global Flood Hazard** Guy J-P. Schumann, Paul D. Bates, Heiko Apel, Giuseppe T. Aronica, 2018-06-05 Global Flood Hazard Subject Category Winner PROSE Awards 2019 Earth Science Selected from more than 500 entries demonstrating exceptional scholarship and making a significant contribution to the field of study Flooding is a costly natural disaster in terms of damage to land

property and infrastructure This volume describes the latest tools and technologies for modeling mapping and predicting large scale flood risk It also presents readers with a range of remote sensing data sets successfully used for predicting and mapping floods at different scales These resources can enable policymakers public planners and developers to plan for and respond to flooding with greater accuracy and effectiveness Describes the latest large scale modeling approaches including hydrological models 2 D flood inundation models and global flood forecasting models Showcases new tools and technologies such as Aqueduct a new web based tool used for global assessment and projection of future flood risk under climate change scenarios Features case studies describing best practice uses of modeling techniques tools and technologies Global Flood Hazard is an indispensable resource for researchers consultants practitioners and policy makers dealing with flood risk flood disaster response flood management and flood mitigation

Weighted Bergman Spaces Induced by Rapidly Increasing Weights Jose Angel Pelaez, Jouni Rattya, 2014-01-08 This monograph is devoted to the study of the weighted Bergman space $A_{p,\omega}$ of the unit disc $\mathbb{D}$ that is induced by a radial continuous weight ω satisfying $\lim_{r \rightarrow 1} \int_r^1 \omega(s) ds < \infty$ Every such $A_{p,\omega}$ lies between the Hardy space H^p and every classical weighted Bergman space $A_{p,\alpha}$ Even if it is well known that H^p is the limit of $A_{p,\alpha}$ as $\alpha \rightarrow 1$ in many respects it is shown that $A_{p,\omega}$ lies closer to H^p than any $A_{p,\alpha}$ and that several finer function theoretic properties of $A_{p,\alpha}$ do not carry over to $A_{p,\omega}$

On the Theory of Weak Turbulence for the Nonlinear Schrodinger Equation M. Escobedo, J. J. L. Velázquez, 2015-10-27 The authors study the Cauchy problem for a kinetic equation arising in the weak turbulence theory for the cubic nonlinear Schrödinger equation They define suitable concepts of weak and mild solutions and prove local and global well posedness results Several qualitative properties of the solutions including long time asymptotics blow up results and condensation in finite time are obtained The authors also prove the existence of a family of solutions that exhibit pulsating behavior

Cognitive Communication and Cooperative HetNet Coexistence Maria-Gabriella Di Benedetto, Faouzi Bader, 2014-01-16 This book written by experts from universities and major industrial research laboratories is devoted to the very hot topic of cognitive radio and networking for cooperative coexistence of heterogeneous wireless networks Selected highly relevant advanced research is presented on spectrum sensing and progress toward the realization of accurate radio environment mapping biomimetic learning for self organizing networks security threats with a special focus on primary user emulation attack and cognition as a tool for green next generation networks The research activities covered include work undertaken within the framework of the European COST Action IC0902 which is geared towards the definition of a European platform for cognitive radio and networks Communications engineers R D engineers researchers and students will all benefit

from this complete reference on recent advances in wireless communications and the design and implementation of cognitive radio systems and networks **Lie Algebras, Lie Superalgebras, Vertex Algebras and Related Topics** Kailash C. Misra, Daniel K. Nakano, Brian J. Parshall, 2016-06-28 This book contains the proceedings of the 2012 2014 Southeastern Lie Theory Workshop Series held at North Carolina State University in April 2012 at College of Charleston in December 2012 at Louisiana State University in May 2013 and at University of Georgia in May 2014 Some of the articles by experts in the field survey recent developments while others include new results in representations of Lie algebras and quantum groups vertex operator algebras and Lie superalgebras **Access to Scientific Research** David J. Brown, 2015-11-13 The debate about access to scientific research raises questions about the current effectiveness of scholarly communication processes This book explores from an independent point of view the current state of the STM publishing market new publishing technologies and business models as well as the information habit of researchers the politics of research funders and the demand for scientific research as a public good The book also investigates the democratisation of science including how the information needs of knowledge workers outside academia can be embraced in future **Research Memorandum** ,1947 Adelic Divisors on Arithmetic Varieties Atsushi Moriwaki, 2016-06-21 In this article the author generalizes several fundamental results for arithmetic divisors such as the continuity of the volume function the generalized Hodge index theorem Fujita's approximation theorem for arithmetic divisors Zariski decompositions for arithmetic divisors on arithmetic surfaces and a special case of Dirichlet's unit theorem on arithmetic varieties to the case of the adelic arithmetic divisors The Problem of College Readiness William G. Tierney, Julia C. Duncheon, 2015-03-30 Though more students are entering college many drop out especially those who are low income and or of color To address this problem educational stakeholders have focused on the concept of college readiness or the preparation a student needs to succeed in college However what it means to be college ready and how to help more students become ready are questions without clear answers By way of historical and contemporary analyses this book uses California as a case study to demonstrate how the state has endeavored to make postsecondary opportunity accessible for all students The contributors also explore the challenges that remain and address what states and schools can do to improve college readiness and completion Elements of Classical and Geometric Optimization Debasish Roy, G Visweswara Rao, 2024-01-25 This comprehensive textbook covers both classical and geometric aspects of optimization using methods deterministic and stochastic in a single volume and in a language accessible to non mathematicians It will help serve as an ideal study material for senior undergraduate and graduate students in the fields of civil mechanical aerospace electrical electronics and communication engineering The book includes Derivative based Methods of Optimization Direct Search Methods of Optimization Basics of Riemannian Differential Geometry Geometric Methods of Optimization using Riemannian Langevin Dynamics Stochastic Analysis on Manifolds and Geometric Optimization Methods This textbook comprehensively treats both classical and geometric optimization methods including deterministic

and stochastic Monte Carlo schemes It offers an extensive coverage of important topics including derivative based methods penalty function methods method of gradient projection evolutionary methods geometric search using Riemannian Langevin dynamics and stochastic dynamics on manifolds The textbook is accompanied by online resources including MATLAB codes which are uploaded on our website The textbook is primarily written for senior undergraduate and graduate students in all applied science and engineering disciplines and can be used as a main or supplementary text for courses on classical and geometric optimization

IGNOU BCA Communication Skills Previous Year Unsolved Papers MCS 015 Manish Soni, 2024-11-13 Communication skills are essential for success in both academic and professional settings They involve a range of competencies such as expressing ideas clearly active listening public speaking group discussions and the effective use of verbal and non verbal communication Understanding the significance of these skills in today's world the Indira Gandhi National Open University IGNOU has included Communication Skills as a crucial part of the BCA curriculum helping students enhance their overall personality and professional readiness IGNOU BCA Communication Skills Previous Year Unsolved Papers MCS 015 is a thoughtfully curated collection of unsolved question papers from previous IGNOU examinations This book is designed to help students become familiar with exam patterns assess their preparation level and develop a deeper understanding of communication concepts Covering key areas like interpersonal communication conflict resolution and presentation skills the book encourages active learning and critical thinking We hope this compilation proves to be a valuable resource for exam preparation and a practical guide to mastering effective communication

After the Education Wars Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers *After the Education Wars* helps us to see a better way forward Cathy N Davidson The New York Times Book Review *After the Education Wars* is an important book that points the way to genuine reform Diane Ravitch author of *Reign of Error* and *The Death and Life of the Great American School System* A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad

and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world. After the Education Wars explains how the market based measures and carrot and stick incentives informing today's reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well. These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up. Lessons also learned from both the open source software and quality movements. The good news is that solutions born of this philosophy are all around us. From Brockton Massachusetts where the state's once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life. A welcome exception to the doom and gloom canon of education reform. After the Education Wars makes clear that what's needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools.

Proof of the 1-Factorization and Hamilton Decomposition Conjectures Béla Csaba, Daniela Kühn, Allan Lo, Deryk Osthus, Andrew Treglown, 2016-10-05. In this paper the authors prove the following results via a unified approach for all sufficiently large n .

- i 1 factorization conjecture Suppose that n is even and $D \geq n/4 + 1$. Then every D regular graph G on n vertices has a decomposition into perfect matchings. Equivalently G is D -factorable.
- ii Hamilton decomposition conjecture Suppose that $D \geq n/2$. Then every D regular graph G on n vertices has a decomposition into Hamilton cycles and at most one perfect matching.
- iii Optimal packings of Hamilton cycles Suppose that G is a graph on n vertices with minimum degree $\geq n/2$. Then G contains at least $\lfloor n/2 \rfloor$ edge disjoint Hamilton cycles. Here $\lfloor n/2 \rfloor$ denotes the degree of the largest even regular spanning subgraph one can guarantee in a graph on n vertices with minimum degree $\geq n/2$.

It was first explicitly stated by Chetwynd and Hilton. ii and the special case $n/2$ of iii answer questions of Nash Williams from 1970. All of the above bounds are best possible.

Unveiling the Energy of Verbal Art: An Psychological Sojourn through **Maths Memo June 2013**

In some sort of inundated with monitors and the cacophony of quick transmission, the profound energy and emotional resonance of verbal artistry frequently disappear in to obscurity, eclipsed by the regular onslaught of sound and distractions. However, located within the lyrical pages of **Maths Memo June 2013**, a interesting work of fictional brilliance that pulses with raw emotions, lies an wonderful journey waiting to be embarked upon. Written by way of a virtuoso wordsmith, this enchanting opus courses readers on an emotional odyssey, delicately exposing the latent potential and profound influence stuck within the complex web of language. Within the heart-wrenching expanse with this evocative analysis, we shall embark upon an introspective exploration of the book is key styles, dissect their captivating writing style, and immerse ourselves in the indelible effect it leaves upon the depths of readers souls.
