Possible Answers and Lesson Tips

Healthy Snack

Students are required to draw an equal number of strawberries and pears on each plate. The amount of strawberries and pears, as long as it is equal, students are required to write a number sentence next to each picture that explains how many strawberries, how many pears and how many pieces of fruit in total.

Example: A student might draw 5 strawberries and 5 pears. The number sentence is $5 + 5 = 10$.

Tip: Discuss the meaning of the word equal and talk about how this might remind students that their drawings on each plate need to be equal, while also reminding them to draw several pieces of fruit. The plus and equals sign are included as an example for students to have to record their number sentence next to their drawings. You may wish to remind your students to include other number sentences.

One Apple

Students are required to write number sentences that have the 1 as the answer.

One Apple

Kelly gave some apples away to her friends at school. She was left with one apple to eat for herself. She wrote down how many she started with, how many she gave away and how many she had left. What number sentences might Kelly have written?

Healthy Snack

For a healthy snack, Mike put some strawberries and some pears on his plate. There was an equal amount of strawberries and pears. What might this look like? Draw a different number on each plate. Write a number sentence to match each picture for how many strawberries, how many pears and how many pieces of fruit in total.
