education for 18 years following a career in IT interactivity only available through Vitalsource eBook *Resources in Education*, 2000 *Teaching 14-19* Georgina Donovan, 2013-11-19 The emergence of the new 14 19 sector raises huge learning and teaching issues for both schools and colleges of further education A new generation of skilled and flexible professionals will need to be trained and re trained Teachers in both sectors are understandably nervous about the impending changes Covering everything a teacher needs to know about learning and teaching across these phases this book supports recent government policy initiatives for the 14 19 sector covers how to teach the 14 19 age phase in both schools and colleges addresses issues of concern for both teachers and college lectures helps both groups appreciate the background and rationale of the other sector With a FAQ format lots of practical advice and illustrative case studies this book will be vital for all practitioners experienced and trainee in both secondary and post compulsory education *Teaching, Tutoring and Training in the Lifelong Learning Sector* Susan Wallace, 2011-06-09 This core text provides comprehensive support for pre service and in service trainee teachers in the Lifelong Learning Sector covering all they need to know to achieve QTLS status Supporting trainees through all stages of their professional development the text takes the reader through the theoretical background underpinning teaching and learning and offers practical guidance on day to day challenges This fourth edition has been fully revised and updated and includes a new chapter on teaching practice with notes on observation and lesson planning New information on behaviour management has been added to support trainees in an aspect of teaching that many find challenging **Politics of Quality Improvement in English Further Education** Zahid Naz, 2023-01-12 This book offers a rich account of how quality improvement agendas informed by neoliberalism create contradictory and complex contexts in which teachers produce different types of practices for specific purposes Drawing on Michel Foucault's analytical tools archaeology and genealogy this book weaves together findings from classroom observations field notes and interviews to explore the dichotomies between practices focussing on day to day pedagogies and practices concerned with performance management and accountability initiatives By attending to a Foucauldian conception of power and counter conduct it explores new means of defining quality in teaching spaces After considering existing quality assurance judgements the book illuminates the significance of moving slightly away from an institutionalised enterprise culture and loosening relations with reductionist approaches as a starting point While doing so it reworks the idea of quality by presenting other ways of looking at the complex character of pedagogical real's with new insights into an emergentist and process oriented conception of teaching practices The book argues that we need to unlearn our existing knowledge of quality that overlooks contextual constraints and opportunities enmeshed in teaching practices It questions the assumptions that the existing methods of observation are capable of quantifying the quality of education in a classroom or in a college in toto By introducing the idea of documentisation the book breaks new theoretical ground to show that this so called system of robust accountabilities is not as self evident as we believe and why we must rethink quality by unthinking our current common sense Written for

researchers in educational studies practising teachers and policy makers this book combines profound insights from theory and contemporary teaching practices with clear guidelines as to how educational policy making should be approached

Essays on Pedagogy Robin Alexander, 2013-09-05 Seven authoritative contributions to the emerging field of pedagogy and to comparative cultural and policy studies in education A must for those who want to do more than merely comply with received versions of best practice Pedagogy is at last gaining the attention in English speaking countries which it has long enjoyed elsewhere But is it the right kind of attention Do we still tend to equate pedagogy with teaching technique and little more Now that governments too have become interested in it is pedagogy a proper matter for public policy and official prescription In *Essays on Pedagogy* Robin Alexander brings together some of his most powerful recent writing drawing on research undertaken in Britain and other countries to illustrate his view that to engage properly with pedagogy we need to apply cultural historical and international perspectives as well as evidence on how children most effectively learn and teachers most productively teach The book includes chapters on a number of themes expertly woven together the politicisation of school and classroom life and the trend towards a pedagogy of compliance the benefits and hazards of international comparison pedagogical dichotomies old and new and how to avoid them how education and pedagogy might respond to a world in peril the rare and special chemistry of the personal and the professional which produces outstanding teaching the scope and character of pedagogy itself as a field of enquiry and action For those who see teachers as thinking professionals rather than as technicians who merely comply with received views of best practice this book will open minds while maintaining a practical focus For student teachers it will provide a framework for their development Its strong and consistent international perspective will be of interest to educational comparativists but is also an essential response to globalisation and the predicaments now facing humanity as a whole
