The Psychology of Mathematics Education , 2008-01-01 This book paints an alternative and contemporary portrait of psychology within mathematics education drawing on psychoanalytic practices and theory Mathematics education is still a fairly new social science that began as an adjunct to the practice of mathematics in schools some forty years ago defined by a marriage with cognitive psychology As a consequence school mathematics has often been seen as a scientific enterprise centred on the operation of individual minds confronting mathematical ideas Meanwhile psychoanalysis had earlier come into existence through the work of Sigmund Freud And for much of his life Freud had similarly seen his work as scientific a view that later fuelled mainstream practices in psychology Yet Freud s engagement with his patients combined with his literary capabilities produced surprising results defining humans in ways that transcended mere scientific assessment Rather his accounts of humans weaved a rich social tapestry in which individuals were understood relationally to those who shared their world And through re telling the story lines of their lives individuals were able to create alternative futures This dimension of Freud s work provoked an alternative tradition best exemplified in the work of Lacan in which narrative based

understandings linking humans to the social world replaced cognitive models centred on controlling individuals through particular understandings of normality Through its eleven chapters this book provides accounts of how children teachers researchers and mathematical learning can be understood differently towards emphasising how they are each consequential to the many ways in which the world can be created and described [ebook of Vedic maths on Fast Calculation](#) Virender Mehta,2013-10-05

**Teaching Adult Numeracy: Principles & Practice** Griffiths, Graham,Stone, Rachel,2013-09-01 This book offers friendly guidance on how to work with adult learners to develop their numeracy and mathematics skills It brings together current research and practice on teaching adult numeracy into one handy volume and covers the major issues faced by teachers of adult numeracy such as current policy perspectives and implications for teaching practice There are reflective tasks throughout which encourage you to develop and apply your theoretical knowledge to your own experiences Key features include Reviews of existing policy and research and implications for practice Reflective tasks with commentary encouraging you to develop and apply your knowledge Case studies of real student experiences Practical activities and ideas to support the planning teaching and assessment of adult numeracy Drawing on the substantial experience of the contributors who have a wealth of experience as practitioners and researchers in the field this book is an essential resource for trainee and practising teachers of adult numeracy and mathematics It is also an ideal textbook to support teacher training courses leading to a subject specific qualification in teaching numeracy to adults Contributors Jackie Ashton John Barton Carolyn Brooks Martyn Edwards Janette Gibney David Holloway David Kaye Beth Kelly Barbara Newmarch Helen Oughton David Prinn Diana Spurr Rebecca Woolley This is a quite unique book about teaching adult numeracy which will be invaluable to the many practitioners in this field The chapters contributed by a group of experienced and successful lecturers and practitioners include all aspects of this field from methods of teaching specific mathematical topics to more general explorations of dyscalculia and emotional factors in adult learners Each chapter includes research findings and thoughtful presentation of ideas with practical ideas for teaching and tasks for the reader This is a market which has not been served well in the past so it is good to see the gap filled at last Margaret Brown Emeritus Professor of Mathematics Education King's College London UK The editors of this book set out to produce a text that would support teacher education programmes for adult numeracy and their book does that and more The content covers different types of learners different settings different understandings of what numeracy actually is and ranges from commentary on research through case studies to how to hints and tips for teaching Chapters 7 on provoking mathematical thinking and 8 attitudes beliefs and teaching should be a required read for any adult numeracy teacher The book would be at home on any numeracy teacher's desk and would make an excellent set text for numeracy teacher training courses Carol Randall course coordinator for numeracy in the department of Lifelong Learning Teacher Education University of Greenwich UK This book is a welcome addition to the growing literature on adult numeracy It should be essential reading for trainee and practising adult numeracy educators It

brings together relevant research and professional wisdom on a wide variety of aspects of adult numeracy teaching and learning in an accessible way with well focussed tasks for readers to extend their knowledge and understanding While the book is born out of UK concerns and issues it is also relevant to international readers Highly recommended Professor Diana Coben PhD Director National Centre of Literacy Numeracy for Adults University of Waikato New Zealand and Hon Trustee Adults Learning Mathematics A Research Forum ALM [www.alm.online.net](http://www.alm.online.net)

*Literacy in the Secondary School* Maureen Lewis, David Wray, 2014-02-25 First Published in 2000 Literacy is on the agenda in a big way in the United Kingdom The principal target of the National Literacy Strategy from 1997 till the middle of 1999 was the practice of teaching literacy in primary classrooms From 1999 however the target has broadened and now clearly encompasses secondary school teaching as well Very few secondary teachers even of English have received any substantial training in literacy work and if they are to respond in the best way possible to current

initiatives they need help of a very practical nature which enables them to introduce more effective attention to literacy into their subject teaching The aim of this book is to provide an account of the good practice encountered by the authors and offer some valuable practical support to secondary schools and teachers
