The Jewish Nobel Prize in Economics Isaac Benguigui,2021-09-02 One of the most remarkable things about the Jewish people over the last several thousand years has been their creativity in many fields especially in science They have also been impressive in their participation in questioning values dismantling dogmas and the disruption of hidden forces We must underscore the fact that the contribution of Jews to science was out of proportion to the percentage of the population that they represent This remained true in the field of twentieth century economics In illustrating the lives and work of these Nobel Prize winners in economics the author gives us a fascinating story of men often exiles and of modest origins whose science was their vocation and the sharing of knowledge their creed Histoire de la pensée économique au XXe siècle (2) Émile James,1955-01-01T00:00:00+01:00 Cet ouvrage est une r dition num rique d un

Much of this book will be devoted to contemporary theories. This presentation of economic theories of the entrepreneur leads us to wonder about the structural development of the free enterprise system in the short and the long term. Il est destiné aux étudiants de premier cycle d'université et des grandes écoles mais aussi aux hommes et aux femmes engagés dans la vie professionnelle qui cherchent à couvrir ce que le mot économie veut dire. Au fil de cet ouvrage on passe en revue ce qui a été dit et proposé par les grands économistes qui ont façonné la science économique contemporaine et développe la théorie de la consommation et celle de la demande pour chercher à confronter ces théories à la réalité économique telle qu'elle se présente nos yeux. On regarde partir des chiffres comment se présentent le chômage, l'inflation, la croissance. On examine enfin les grands problèmes économiques du monde contemporain. L'originalité de ce manuel au-delà d'une présentation claire et pédagogique des théories et concepts économiques de base est d'appuyer cette présentation sur des exemples concrets puisés dans l'actualité économique et de proposer au lecteur les principaux instruments qui lui permettent de poser un regard neuf sur l'environnement qui l'entoure. Cet ouvrage est le résultat du travail mené par l'équipe pédagogique de première année de l'université Paris Nord Philippe Barbet Laurent Benzoni Arezki Dahmani Olivier Pastré Han Tran Robert Zarader. **Editing Economists and Economists as Editors** Pascal Bridel, 1992 **Histoire des faits et des idées économiques. Le pluralisme des idées.** Anne Isla, 2024-08-20 Après une description de la naissance de la discipline économique et des fondements de l'économie orthodoxe et hétérodoxe, ce manuel est ordonné autour de quatre concepts centraux : le marché, la propriété, la monnaie, la finance. Ces concepts se déclinent en valeur, de la faillite au secteur public, entreprise communs.

politique monnaie Union européenne etc. Chaque fois sont présentées les principales théories qui traitent le sujet que celles qui font partie de l'approche dominante ou pas. Cet ouvrage présente ainsi de façon accessible la richesse et le pluralisme en économie. Sans entrer dans le détail des théories mais en donnant le maximum de références pour le faire sont abordés les faits et les concepts qui ont jalonné l'histoire de la pensée et des faits économiques.

Sébastien Vivier-Lirimont, 2002 **Une initiation à l'économie avec Leontief** Jean Arrouss, 2024-09-02 Cet ouvrage initie les étudiants Licence d'économie CPGE IAE aux travaux de Wassily Leontief prix Nobel d'économie 1973 sur l'analyse input-output. Cette analyse décrit l'interdépendance des activités économiques à partir de ses différentes branches : l'automobile, la sidérurgie, la chimie, la pharmacie. Ainsi pour produire une voiture il faut de l'acier, des pneus, du verre, du plastique, il faut également du travail. De plus pour produire de l'acier on utilise d'autres inputs comme le fer, l'électricité et au travail directement utilisé par le constructeur automobile s'ajoute le travail indirect nécessaire à la fabrication de l'acier, des pneus, du verre, du plastique. La spécificité de cette analyse est donc de prendre en compte les données technologiques de la production dans les différentes branches du système productif, données complémentaires aujourd'hui par la mission de pollution et la consommation d'énergie. Cette analyse conduit à terminer la valeur travail, le contenu en travail direct et indirect des différents biens et services produits et cela vaut également pour la valeur pollution et la valeur énergie des biens.
