R Graphics, Third Edition Paul Murrell, 2018-11-15 This third edition of Paul Murrell's classic book on using R for graphics represents a major update with a complete overhaul in focus and scope. It focuses primarily on the two core graphics packages in R, graphics and grid, and has a new section on integrating graphics. This section includes three new chapters: importing external images into R, integrating the graphics and grid systems, and advanced SVG graphics. The emphasis in this third edition is on having the ability to produce detailed and customised graphics in a wide variety of formats, on being able to share and reuse those graphics, and on being able to integrate graphics from multiple systems. This book is aimed at all levels of R users. For people who are new to R, this book provides an overview of the graphics facilities, which is useful for understanding what to expect from R's graphics functions and how to modify or add to the output they produce. For intermediate level R users, this book provides all of the information necessary to perform sophisticated customizations of plots produced in R. For advanced R users, this book contains vital information for producing coherent, reusable and extensible graphics functions.

Graphical Data Analysis with R Antony Unwin, 2015-06-02 See How Graphics Reveal Information Graphical Data Analysis with R shows you what information you can gain from graphical displays. The book focuses on why you draw graphics to display data and which graphics to draw, and uses R to do so. All the datasets are available in R or one of its packages, and the R code is available at rosuda.org. GDA Graphical data analysis is useful for data cleaning, exploring data structure, detecting outliers and unusual groups, identifying trends and clusters, spotting local patterns, evaluating modelling output, and presenting results. This book guides you in choosing graphics and understanding what information you can glean from them. It can be used as a primary text in a graphical data analysis course, or as a supplement in a statistics course.
