Workbook Steven Heighton,2011 A fresh and provocative picture of what it means to create literature this collection of Steven Heighton s notes to himself as he writes peeks into the mind of an acclaimed author The short pieces reveal Heighton s pointed cutting take on his own work and materialize the musings and meditations that come to him as he scribbles Offering new perspectives and insights into the creative process this wholly original book shows what lies outside the pages of the bestsellers written by this Canadian author *Great Source Write Source* Great Source,2010-12 *Time to Write* John Sylvester Lofty,2015-02-10 Analyzes interviews with students teachers and administrators to develop a new set of literacies essential for student success in the digital age To read John s work is to take on the role of a patient listener A book like a piece of music is scored for time and I feel *Time to Write* is scored adagio I believe that *Time to Write* can be read as a critique of the time chopping approach to education and an argument for presence for being fully open to experience for being there To do good work we must enter something like island time or what John calls existential time or what is sometimes called flow when we lose at least temporarily a sense of clock time from the Foreword by Thomas Newkirk Twenty

five years ago John Sylvester Lofty studied the influence of cultural time values on students resistance to writing instruction in an isolated Maine fishing community For the new edition of *Time to Write* Lofty returned to the island to consider how social and educational developments in the intervening years may have affected both local culture and attitudes toward education Lofty discovered how the island time values that previously informed students literacy learning have been transformed by outside influences including technology social media and the influx of new residents from urban areas Building on the ethnographic findings of the original study the new edition analyzes the current conflict between the digital age time values of constant connections and instant communication and those of school based literacy Lofty examines the new literacies now essential for students in a technologically connected world both those who aspire to continue the traditional island work of lobster fishing and for the many who now choose to pursue other careers and attend college on the mainland

The Best of the Grammarians Francesca Schironi, 2018-10-31 A founding father of the art of philology Aristarchus of Samothrace 216 144 BCE made a profound contribution to ancient scholarship In his study of Homer's Iliad his methods and principles inevitably informed even reshaped his edition of the epic This systematic study places Aristarchus and his fragments preserved in the Iliadic scholia or marginal annotations in the context and cultural environment of his own time Francesca Schironi presents a more robust picture of Aristarchus as a scholar than anyone has offered previously Based on her analysis of over 4 300 fragments from his commentary on the Iliad she reconstructs Aristarchus methodology and its relationship to earlier scholarship especially Aristotelian poetics Schironi departs from the standard commentary on individual fragments and instead organizes them by topic to produce a rigorous scholarly examination of how Aristarchus worked Combining the accuracy and detail of traditional philology with a big picture study of recurrent patterns and methodological trends across Aristarchus work this volume offers a new approach to scholarship in Alexandrian and classical philology It will be the go to reference book on this topic for many years to come and will usher in a new way of addressing the highly technical work of ancient scholars without losing philological accuracy This book will be valuable to classicists and philologists interested in Homer and Homeric criticism in antiquity Hellenistic scholarship and ancient literary criticism

Cantonese as a Second Language John C. Wakefield, 2019-04-09 Cantonese is a language from southern China that is spoken by roughly 70 million people worldwide. It is the language of Hong Kong cinema and has traditionally been the most prominent language spoken in Chinatowns around the world. People choose to learn Cantonese for a variety of social and economic reasons because it is a heritage language that one's relatives speak because it is the language of one's partner and monolingual in laws because it is necessary for living and working in Hong Kong, Macau, Guangzhou, or other Cantonese speaking communities because it is the bridge to fully appreciating and understanding Cantonese culture, or simply because it is an irresistible challenge. Whatever the motivation, more and more people are choosing to learn Cantonese as an additional language. This book discusses many issues related to both acquiring and teaching Cantonese. If you are a learner of Cantonese, this long overdue volume is essential to understanding both the grammatical and the social issues involved with learning this notoriously difficult language. If you are a teacher, this book will be invaluable to gaining insight into your students' motivations and needs. And finally, if you are an applied linguist, the unique aspects related to the acquisition of Cantonese offer a fascinating contribution to the literature.
