Great Britain Prussia 18th Century:

Great Britain & Prussia in the Eighteenth Century Sir Richard Lodge, 1923 History of Humanity: From the sixteenth to the eighteenth century Peter Burke, Sigfried J. de Laet, 1994 The fifth volume of the this series examines historical events and cultural social and political structures which were introduced between the 16th and 18th centuries

Debating Foreign Policy in Eighteenth-Century Britain Jeremy Black, 2016-05-13 It was during the course of the eighteenth century that Britain's status as a major maritime and commercial power was forged shaping the political economic and military policies of the nation for the next two centuries Starting from a relatively minor role in global affairs before 1700 Britain rapidly rose to become a significant player in European affairs and leading imperial power by 1800 In this commanding contribution to the subject Jeremy Black draws on his extensive expertise to examine how British political culture and public debate in this period responded to and in part shaped this transition to an increasingly prominent role in world affairs Rather than offering a familiar narrative of Britain's eighteenth century foreign policy this book instead focuses upon how this policy was debated and written about in British society Taking as a central theme the debate over policy and the development of public culture and politics the study explores how these were linked to developing relations with Europe and helped shape colonial strategies and expectations It highlights how widely shared concerns about such issues as national defence the strength of the Royal Navy and trade protection presented little consensus in how they were to be realised and were the subject of fierce public debate The book underlines how these kinds of issues were not considered in the abstract but in terms of a political community that was divided over a series of key issues By probing the problems and issues surrounding the need to define and discuss Britain's foreign policy in semi public and public contexts this book offers a fascinating insight into questions of perceived national interest and how this developed and evolved over the course of the eighteenth century This work complements the author's other studies by joining the institutional focus seen there to a wider assessment of public politics and print culture and as such will make a central contribution to studies of eighteenth century Britain and Europe Commercial Relations of the United States ,1887 Reports on the Paris Universal Exhibition 1867 ,1869 **Lists and Indexes** Great Britain. as how these ideas were implemented by the nation's early presidents. The framers of the Constitution disagreed about the scope of the new executive role they were creating and this volume reveals the ways the duties and power of the office developed contrary to many expectations. Here leading scholars of the early republic examine principles from European thought and culture that were key to establishing the conceptual language and institutional parameters for the American executive office. Unpacking the debates at the 1787 Constitutional Convention, these essays describe how the Constitution left room for the first presidents to set patterns of behavior and establish a range of duties to make the office functional within a governmental system of checks and balances. Contributors explore how these presidents understood their positions and fleshed out their full responsibilities according to the everyday operations required to succeed. As disputes continue to surround the limits of executive power today, this volume helps identify and explain the circumstances in which limits can be imposed on presidents who seem to dangerously exceed the constitutional parameters of their office. *Political Thought and the Origins of the American Presidency* demonstrates that this distinctive time-tested role developed from a fraught, historically contingent and contested process. Contributors: Claire Rydell Arcenas, Lindsay M. Chervinsky, François Furstenberg, Jonathan Gienapp, Daniel J. Hulsebosch, Ben Lowe, Max Skjensberg, Eric Slauter, Caroline Winterer, Blair Worden, Rosemarie Zagarri. A volume in the Alan B. and Charna Larkin Series on the American Presidency.

Escaping the Deadly Embrace Andrea Bartoletti, 2022-11-15. Encirclement. Andrea Bartoletti argues is an essential strategic possibility of the international system and a key trigger of major war. Using historical case studies, *Escaping the Deadly Embrace* examines how great powers try to escape the two-front war problem and seek to preserve their security. Encirclement is a geographic variable that occurs in the presence of one or two great powers on two different borders of the surrounded great power. The surrounding great powers may not have the capacity to initiate a joint invasion. Yet their threatening presence triggers a double security dilemma for the encircled great power, which has to disperse its army to secure its borders. When the surrounding great powers become capable of launching a two-front attack, the encircled great power initiates war. This situation, disastrous in itself, can also lead to war contagion when other great powers intervene in the new conflict owing to the rival-based network of alliances. Combining archival work and historiographical analysis, *Escaping the Deadly Embrace* demonstrates the efficacy of this by assessing three major wars: the Italian Wars, the Thirty Years War, and World War I. These findings, Bartoletti shows, have important implications for future major wars. Challenging the current focus on the US-China rivalry, he argues that the most concerning strategic scenario is the encirclement of China by India and Russia. *Great Power Rivalries* William R. Thompson, 1999. This volume examines interstate rivalries of the past 500 years.

providing case studies of those between land powers with continental orientations and leading maritime powers and challengers The contributors focus on the transition from commercial to strategic rivalry *Reports from the Consuls of the United States* ,1887
