Thomas Olliff,David M. Theobald,2016-06-07 Scientists have been warning for years that human activity is heating up the planet and climate change is under way We are only just beginning to acknowledge the serious effects this will have on all life on Earth The federal government is crafting broad scale strategies to protect wildland ecosystems from the worst effects of climate change One of the greatest challenges is to get the latest science into the hands of resource managers entrusted with vulnerable wildland ecosystems This book examines climate and land use changes in montane environments assesses the vulnerability of species and ecosystems to these changes and provides resource managers with collaborative management approaches to mitigate expected impacts Climate Change in

Wildlands proposes a new kind of collaboration between scientists and managers a science derived framework and common sense approaches for keeping parks and protected areas healthy on a rapidly changing planet *The Regional Review*
