Handbook of Biophilic City Planning & Design Timothy Beatley, 2016 This publication offers practical advice and inspiration for ensuring that nature in the city is more than infrastructure that it also promotes well being and creates an emotional connection to the earth among urban residents Divided into six parts the Handbook begins by introducing key ideas literature and theory about biophilic urbanism Chapters highlight urban biophilic innovations in more than a dozen global cities The final part concludes with lessons on how to advance an agenda for urban biophilia and an extensive list of resources

Publisher **Biophilic Cities** Timothy Beatley, 2010-10-21 Tim Beatley has long been a leader in advocating for the greening of cities But too often he notes urban greening efforts focus on everything except nature emphasizing such elements as public transit renewable energy production and energy efficient building systems While these are important aspects of reimagining urban living they are not enough says Beatley We must remember that human beings have an innate need to connect with the natural world the biophilia hypothesis And any vision of a sustainable urban future must place its focus squarely on nature on the presence conservation and celebration of the actual green features and natural life forms A biophilic city is more than simply a biodiverse city says Beatley It is a place that learns from nature and emulates natural systems incorporates natural forms and images into its buildings and cityscapes and designs and plans in conjunction with nature A biophilic city cherishes the natural features that already exist but also works to restore and repair what has been lost or degraded In *Biophilic Cities* Beatley not only outlines

the essential elements of a biophilic city but provides examples and stories about cities that have successfully integrated biophilic elements from the building to the regional level around the world From urban ecological networks and connected systems of urban greenspace to green rooftops and green walls and sidewalk gardens Beatley reviews the emerging practice of biophilic urban design and planning and tells many compelling stories of individuals and groups working hard to transform cities from grey and lifeless to green and biodiverse
