Entrepreneurs in High Technology Edward B. Roberts, 1991-08-22 The ingredients for success in starting and developing a technology based company aren't obvious Why for example did Digital Equipment Corporation succeed and indeed become one of the most successful high tech corporations in the world while dozens of other companies with similar beginnings fail It is a question that demands careful consideration by anyone setting up a new company or who is interested in starting one In *Entrepreneurs in High Technology* Edward Roberts a Professor at the MIT Sloan School of Management offers entrepreneurs a goldmine of information on starting financing and expanding a high tech firm His book reveals the results of research conducted over twenty five years on several hundred high tech firms and it reflects the insights of the author's own first hand experience as a company founder director and venture capitalist Focusing on firms in the Greater Boston area many of which have had technological links with MIT Roberts traces the origins and the evolution of the high technology failures and successes He examines the work experience and family backgrounds of successful technical entrepreneurs their sources of funding and the ways they respond to the challenge of business growth He compares the track records of firms with multi founder teams and firms with individual founders contrasts the performance of consulting firms and research and development contractors against companies that start out with a product identifies the factors that limit an enterprise's ability to raise outside capital and explores the critical influence of marketing orientation on successful companies In a penetrating analysis of highly successful ventures the author reveals the importance of strategically transforming the company to a market oriented focus and he examines the widespread tendency even among the most successful high tech firms to displace the founder before the company achieves super success For anyone planning to start a technology based enterprise *Entrepreneurs in High Technology* is essential reading an invaluable preview of the financial organizational and marketing issues that confront every new high tech venture For business and technology watchers it is an informative account of the promise and the perils entailed in bringing innovative ideas to the marketplace

Handbook of Research on Business Angels Hans Landström, Colin Mason, 2016-09-28 Business angels are recognized as playing a key role in financing the start up and early stages of new ventures However our knowledge of how business angels operate remains limited and highly fragmented This *Handbook* provides a synthesis of research on business angels It adopts an international perspective to reflect the spread of angel investing around the world The increasing number of government initiatives to promote angel investing is also reflected in the book with an assessment of the most common support schemes Adopting an international focus the expert group of contributors examine business angels themselves the evolution of the market the various stages of the investment process and the role of public policy in influencing angel investment They each conclude their chapters with an agenda for future research on business angels Students and scholars of entrepreneurship

entrepreneurial finance and related subjects will find this book to be an invaluable resource for their work. In particular, they will benefit from the research agendas that conclude each chapter. This Handbook will also be of interest to policy makers and other practitioners looking to enhance their understanding of the design and need for such interventions.

Enterprise: Concepts and Issues Norin Arshed, Mike Danson, 2016-01-31. Introduces the terms, theories, and practices in the fields of entrepreneurship and enterprise to look deeper into this phenomena. It covers the origins and development of entrepreneurialism and addresses the drivers, barriers, and evolution into new areas of business and economic activity.

The Geography of Academic Entrepreneurship Helen Lawton Smith, 2023-06-01. Building on a variety of contrasting perspectives, this book focuses on the connection between university spin-offs and regional economic development. It aptly captures the diverse range of concepts relating to the main participants in the process of university spin-offs, reflecting on their roles and how these may have changed. *Handbook of Entrepreneurial Dynamics* William B. Gartner, Kelly G. Shaver, Nancy M. Carter, Paul D. Reynolds, 2004-06-21. This important Handbook of Entrepreneurial Dynamics reports on the Panel Study of Entrepreneurial Dynamics (PSED), the most comprehensive scientifically representative study to date of nascent entrepreneurs. The book is unique because the study identified individuals in the process of creating new businesses to understand how, at its very source, people move from considering the option of starting a new business to its actual founding. This has never been done before in the history of entrepreneurship research. I cannot recommend this book more strongly to entrepreneurship scholars and those interested in where entrepreneurs come from and how they move from their initial idea to new venture founding. Claudia Bird Schoonhoven, University of California, Irvine. This Handbook makes a terrific contribution to understanding entrepreneurship and new business creation. Its 38 chapters report major findings from the Panel Study of Entrepreneurial Dynamics (PSED), an unprecedented research program involving more than a hundred researchers from 10 countries. This Handbook is must reading for anyone interested in entrepreneurship research. Andrew H. Van de Ven, Carlson School of Management, University of Minnesota. Entrepreneurial activity provides profound positive benefits across an important set of measures of social and economic well-being, much of it concentrated in new economic sectors such as information technology. Yet even though entrepreneurship has been shown to provide many benefits, it is surprising that there has not been a systematic study of the entrepreneurial process. The Handbook of Entrepreneurial Dynamics: The Process of Business Creation fills this gap by offering theories, ideas, and measures that can be used to explore and understand the factors that encompass and influence the creation of new businesses. The chapters in the handbook provide the rationale for questionnaires used in the Panel Study of Entrepreneurial Dynamics (PSED). The PSED is a research program that was initiated to provide systematic, reliable, and generalizable data on important features of the new business creation process. The PSED includes information on the proportion and characteristics of the adult population involved in efforts to start businesses, the activities and characteristics that comprise the nature of the business start-up process, and the

proportion and characteristics of those business start up efforts that actually become new businesses The handbook also describes the PSED data collection process provides documentation of the interview schedules codebooks data preparation and weighting scheme as well as offers examples of how analyses of PSED data might be conducted The authors identify specific measures that can be used to operationalize theory as well as provide evidence from the PSED data sets on these measures reliability and validity The Handbook of Entrepreneurial Dynamics is ideal for a sizeable audience including graduate students academics and librarians in schools of business and management who need a comprehensive reference on business creation In addition researchers and policy makers at the federal state and local level will find this an invaluable reference covering all of the factors involved in new venture formation Key Features Considers categories of data not available prior to the PSED Includes a comprehensive overview of theories about new business formation Provides demographics of nascent entrepreneurs Analyzes the cognitive characteristics of nascent entrepreneurs Explores all of the processes of new business formation

EBOOK: Exploring Innovation David Smith, 2015-03-16 The third edition of *Exploring Innovation* offers an engaging new perspective on innovation The book provides business students with a clear understanding of the nature of innovation and how it can be managed and fostered Written in an accessible style *Exploring Innovation* encourages students to challenge their pre conceived ideas about innovation and to see it as a continuous on going process by exploring some of the biggest developments in innovation Lively discussions of key concepts are provide through numerous case studies on a range of original products and services bringing business theories to life The new edition has been fully revised and updated with a more intuitive structure to now feature A greater emphasis on what innovation involves A new chapter on Value Capture Expanded coverage on Services and Process Innovations Two new chapters covering Global and Green trends in innovation 8 new major case studies and more than 40 new mini cases including Twitter Angry Birds Netflix Google and Toyota

University Evolution, Entrepreneurial Activity and Regional Competitiveness David Audretsch, Erik Lehmann, Michele Meoli, Silvio Vismara, 2015-07-11 This book aims to bring together different contributions highlighting how the recent changes that modify universities activities such as the necessity to internationalize and crucially rely on third party funding and the new entrepreneurial trajectories stemming from the recent economic financial crisis contribute to emphasize the existing differences between successful and lagging regions as occurred at a country level e g Southern Europe This book should be of interest to economists sociologists political scientists as well as to policy makers and practitioners involved in the creation of value at a local level

Handbook of Research on Venture Capital Hans Landström, 2007 Provides an overview of the various facets of venture capital and their related issues This book surveys venture capital as a research field and explores the various conceptual theoretical methodological and geographic aspects It focuses on the specific environs of venture capital
