The Theory of Credit Contracts Christian Prem,2020-02-08 In this book Christian Prem features new innovations on several levels On a conceptual level he presents a complete restructuring and modularisation of the field

Davis,2024-02-01 Mainstream economics assumes economic agents act and make decisions to maximize their utility This model of economic behavior based on rational choice theory has come under increasing attack in economics because it does not accurately reflect the way people behave and reason The shift towards a more realistic account of economic agents has been mostly associated with the rise of behavioral economics which views individuals through the lens of bounded rationality Identity Capabilities and Changing Economics goes further and uses identity analysis to build on this critique of the utility conception of individuals arguing it should be replaced by a conception of economic agents in an uncertain world as socially embedded and identified with their capabilities Written by one of the world s leading philosophers of economics the book develops a new approach to economics theory of the individual explaining individuals as adaptive and reflexive rather than utility maximizing *Journal of Economic Literature* ,2014
