incentive to follow the study of business in the other regions if for no other reason than that many global firms from each region operate in all regions now. Nonetheless, the more important reason for knowledge transfer among researchers of each region is that these exchanges can only advance everyone's research. Henry Yeung and the contributors are to be thanked for setting out a rich agenda for research on Asian business that will elevate this study to equality with research elsewhere in the world.

Eurasian Geography and Economics This book is extremely comprehensive and well researched. It will be of particular interest to scholars in the fields of international business, development studies, economic geography, regional studies, as well as international and national policymakers.

Science Technology Society The rise of Asia as an important region for global business has been widely recognized as one of the most significant economic phenomena in the new millennium. This accessible and comprehensive Handbook brings together state-of-the-art reviews of Asian business in an expansive range of areas including business organizations, strategic management, marketing, state-business relations, business and development, business policy issues. It is argued that whilst academic studies on Asian business have been in existence for over two decades, there is relatively little systematic integration of our knowledge and research on Asian business. The contributors, drawn from a variety of disciplines within the social sciences, aim to redress the balance with their lively, cutting-edge discussion. Serving as a timely overview of more than two decades of scholarly research, this Handbook will be an essential resource for academics, students, and researchers interested in Asian business.

Confucian Culture

and Competition Law in East Asia Jingyuan Ma, Mel Marquis, 2022-09-08 Competition law is a significant legal transplant in East Asia where it has come into contact with deeply rooted variants of Confucian culture. This timely volume analyses cultural factors in mainland China, Japan and Korea, focusing on their shared but diversely evolved Confucian heritage. These factors distinguish the competition law systems of these countries from those of major western jurisdictions in terms of the goals served by the law, the way enforcement is structured and the way subjects of the law respond to it. Concepts from cultural studies inform a new and eclectic perspective on these dynamics, with the authors also drawing on ideas from law and economics, comparative law, East Asian studies, political science, business management and ethics and institutional economics. The volume presents a model for cultural analysis of comparative legal topics and contributes to a greater understanding of the challenges to deeper convergence of competition laws between East and West. International Handbook of Urban Education

William T. Pink, George W. Noblit, 2008-09-03 It is evident that urban education has become the central focus of educators at the present time. In the U.S. for example, almost one third of all school age children attend schools in large urban school districts. It is in these urban schools where the diversity of cultures and languages is highest and where student learning is most problematic. What has emerged from recent work to improve urban schools is the insight that there is no one size fits all panacea. Rather, we have discovered that the local context shapes in critically important ways what will be effective at the school level. The universality of the problematics with urban education together with the importance of understanding the local or situated context of improvement interventions brings into sharp focus the importance and timeliness of an undertaking like the International Handbook of Urban Education. An important focus of the International Handbook of Urban Education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region. An important question to be answered for example is what it takes in terms of resources, political will and policy actions to improve urban education. **Business Ethics in East Asia**

Chris Rowley, Ingyu Oh, 2018-07-26 For organisations and management the role of business ethics is of key importance but to what extent business ethics are actually new or fashionable or universally applicable are interesting questions. Asia has been the site of contests between competing economic and ethical views of how economic norms and institutions are organized. This book examines the evolutionary similarities and differences of institutionalizing business ethics in Asia in a historical context and in comparison to better explored business ethics literature both empirically and theoretically. This collection uses both historical and contemporary cases in Japan, Korea and China to show that these countries have tried to balance their traditional business ethics norms and values with those that have been introduced from the West. Underpinning the case studies is the fact that these countries have historically pursued ethical mandates in running private corporations although corruptive practices were also rampant during different historical periods. *Handbook of Research on High-Technology Entrepreneurs*
