Lost in the Long Transition William L. Alexander, 2009-09-24 In *Lost in the Long Transition* a group of scholars who conducted fieldwork research in post dictatorship Chile during the transition to democracy critically examine the effects of the country's adherence to neoliberal economic development and social policies Shifting government responsibility for social services and public resources to the private sector reducing restrictions on foreign investment and promoting free trade and export production neoliberalism began during the Pinochet dictatorship and was adopted across Latin America in the 1980s With the return of civilian government the pursuit of justice and equity worked alongside a pact of compromise and an economic model that brought prosperity for some entrenched poverty for others and social consequences for all The authors who come from the disciplines of cultural anthropology history political science and geography focus their research perspectives on issues including privatization of water rights in arid lands tuberculosis and the public health crisis labor strikes and the changing role of unions the environmental and cultural impacts of export development initiatives on small scale fishing communities natural resource conservation in the private sector the political ecology of copper the fight for affordable housing homelessness and citizenship rights under the judicial system and the gender experiences of returned exiles In the years leading up to the global financial meltdown of 2008 many Latin American governments responding to inequities at home and attempting to pull themselves out of debt dependency moved away from the Chilean model This book examines the social costs of that model and the growing resistance to neoliberalism in Chile providing ethnographic details of the struggles of those excluded from its benefits This research offers a look at the lives of those whose stories may have otherwise been *Lost in the Long Transition*

Neoliberalism and Commodity Production in Mexico Thomas Weaver, James B. Greenberg, William L. Alexander, Anne Browning-Aiken, 2012-06-15 *Neoliberalism and Commodity Production in Mexico* details the impact of neoliberal practice on the production and exchange of basic resources in working class communities in Mexico Using anthropological investigations and a market driven approach contributors explain how uneven policies have undermined constitutional protections and working class interests since the Mexican Revolution of 1910 Detailed ethnographic fieldwork shows how foreign investment privatization deregulation and elimination of welfare benefits have devastated national industries and natural resources and threatened agriculture driving the campesinos and working class deeper into poverty Focusing on specific commodity chains and the

changes to production and marketing under neoliberalism the contributors highlight the detrimental impacts of policies by telling the stories of those most affected by these changes They detail the complex interplay of local and global forces from the politically mediated systems of demand found at the local level to the increasingly powerful municipal and state governments and the global trade and banking institutions Sharing a common theoretical perspective and method throughout the chapters *Neoliberalism and Commodity Production in Mexico* is a multi sided ethnography that makes a significant contribution to studies of neoliberal ideology in practice *Intersectional Feminism in the Age of Transnationalism* Rayssa E. Amador, Olga Bezhanova, 2021-02-17 *Intersectional Feminism in the Age of Transnationalism* Voices from the Margins explores the limitations of the transnationalist approach to feminism and questions the neoliberal emphasis on individual freedom and consumer choice as the central goals of feminist activism The contributions to the volume discuss such varied topics as fiction by Edwidge Danticat Judith Ortiz Cofer and Diamela Eltit visual art of Laura Aguilar and Maruja Mallo films directed by Lucrecia Martel a TV series based on a novel by Mar a Due as the art activism of Ani Ganzala and Zinha Franco and the philosophical thought of Gloria Anzald a All chapters proceed from the belief in the continued usefulness of intersectionality as a valuable category of critical analysis that is particularly necessary at the time when the effects of neoliberal globalization are undermining many familiar categories of critical inquiry *Industrial Relations After Pinochet* Indira Palacios-Valladares, 2011 In recent decades many countries have implemented neoliberal reforms that have had adverse consequences for unions In Chile this process was particularly sweeping having occurred under the right wing dictatorship of General Augusto Pinochet Despite the transition to democracy in 1990 the labor relations system created by the Pinochet regime is still largely in place Although a number of works have assessed the conditions of unionism in post dictatorship Chile little attention has been paid to the firm level which is where most of the collective bargaining now takes place This book takes a qualitative approach to examining the dynamics of collective bargaining at the firm level in democratic Chile by investigating the causes of variation in the bargaining outcomes of fifty three unions in four firms in the banking manufacturing retail and telecommunications sectors It seeks to explain both variation in individual union bargaining outcomes within firms and aggregate differences in outcomes between firms The book also provides a systematic explanation of the decline of collective bargaining results among Chilean unions in general during the 1990s and early 2000s

homeownership has been a significant symbol of governmental benevolence and poverty reduction Under Pinochet's neoliberalism subsidized housing and slum eradication programs displaced many squatters while awarding them homes of their own This process in addition to ongoing forms of activism has permitted the vast majority of squatters to live in homes with property titles a momentous change of the past half century This triumph is tempered by the fact that today the urban poor struggle with high levels of unemployment and underemployment significant debt and a profoundly segregated and hostile urban landscape They also find it more difficult to mobilize than in the past and as homeowners they can no longer rally around the cause of housing rights Citing cultural theorists from Marx to Foucault Murphy directly links the importance of home ownership and property rights among Santiago's urban poor to definitions of Chilean citizenship and propriety He explores how the deeply embedded liberal belief system of individual property ownership has shaped political social and physical landscapes in the city His approach sheds light on the role that social movements and the gendered contours of home life have played in the making of citizenship It also illuminates processes through which squatters have received legally sanctioned homes of their own a phenomenon of critical importance in cities throughout much of Latin America and the Global South
