Hair Like a Fox Danny Roddy, 2013. While it is often stated with great confidence that pattern baldness is the result of defective genes and male androgenic hormones, e.g. testosterone, DHT, the theory is physiologically unsound. In fact, after 60 years of research, the genetic androgen doctrine has produced a single FDA approved therapy that works less than 50% the time and can result in permanent chemical castration. Standing on the shoulders of giants, e.g. Otto Warburg, Albert Szent-Györgyi, Gilbert Ling, Ray Peat, and others, **Hair Like a Fox** sets up an alternative bioenergetic model of pattern hair loss with a focus on the smallest unit of life, the cell. This same context elucidates simple yet effective therapies for halting and perhaps reversing pattern hair loss in a way that harmonizes with our unique physiology.
