Handbook Of Biophilic City Planning Design:

Handbook of Biophilic City Planning & Design Timothy Beatley, 2016 This publication offers practical advice and inspiration for ensuring that nature in the city is more than infrastructure that it also promotes well being and creates an emotional connection to the earth among urban residents Divided into six parts the Handbook begins by introducing key ideas literature and theory about biophilic urbanism Chapters highlight urban biophilic innovations in more than a dozen global cities The final part concludes with lessons on how to advance an agenda for urban biophilia and an extensive list of resources Publisher

The Emergence of Biophilic Design Jana Söderlund, 2019-10-18 This book addresses the emergence of biophilic design a form of design that looks at people's intrinsic connection with nature There is no denying that biophilic design is rapidly expanding globally as an effective response to pressing issues in urban areas and built environments From being a term few had heard of in 2012 when the author's research began to one that is currently trending in a broad range of disciplines the story of its emergence has never been properly told The story of the emergence of biophilic design is the story of a social movement and how a gathering of people with a common interest and passion can spark a global trend The book and the stories within are not only engaging but also informative and educational offering readers an in depth understanding of what biophilic design is all about and how to promote its implementation in their own built environment Hopefully they will inspire people to act to campaign and to implement initiatives in their urban environment with the confidence that they are capable of making a difference The author spent three years researching the emergence of biophilic design and why and how it was driven by certain people who championed the concept Part of the author's research involved a three month tour of ten North American cities during which she interviewed 26 key players These people ranged from community leaders landscape architects and academics to the CEOs of NGOs and government leaders The result is a collection of stories that illustrate the evolution of biophilic design and how it was frequently born from a passion for belief in and love of nature as well as a response to an urban crisis

Regenerating Cities Maria Elena Zingoni de Baro, 2022-01-18 This book sets out the discussion on how cities can contribute solutions to some of the challenges the urbanised world is facing such as the pressure of growing populations mitigation of effects of and adaptation to globally changing environmental climate and public health conditions Presenting a detailed explanation of the causes behind the current state of modern cities the book advocates for a paradigm shift to improve the quality of life of ever increasing urban inhabitants whilst nourishing the natural systems that sustain human and non human life in the planet Recognising the precious role that nature plays in the functioning of cities it delves into the study of biophilic design and regenerative development The book argues that these social ecological design approaches can act as catalysts to develop conditions in urban settings that are beneficial for natural and human systems to thrive and flourish both in ecosystem services and social cultural systems This is particularly relevant for the design of new quality precincts or the regeneration of

degraded urban spaces to promote health wellbeing and urban resilience A framework is proposed to guide the process of thinking about designing and building healthier more liveable and resilient urban environments that raise the quality of life in cities The method can be used by researchers practitioners urban designers urban planners architects and landscape architects interested in developing their work within a social ecological perspective It can also be used by local governments and agencies to underpin policy making and by educational institutions to prepare graduates with necessary skills to respond to current and future built environment challenges

Oxford Textbook of Nature and Public Health Matilda van den Bosch, William Bird, 2018-01-05 Human beings have always been affected by their surroundings There are various health benefits linked to being able to access to nature including increased physical activity stress recovery and the stimulation of child cognitive development The Oxford Textbook of Nature and Public Health provides a broad and inclusive picture of the relationship between our own health and the natural environment All aspects of this unique relationship are covered ranging from disease prevention through physical activity in green spaces to innovative ecosystem services such as climate change adaptation by urban trees Potential hazardous consequences are also discussed including natural disasters vector borne pathogens and allergies This book analyses the complexity of our human interaction with nature and includes sections for example epigenetics stress physiology and impact assessments These topics are all interconnected and fundamental for reaching a full understanding of the role of nature in public health and wellbeing Much of the recent literature on environmental health has primarily described potential threats from our natural surroundings The Oxford Textbook of Nature and Public Health instead focuses on how nature can positively impact our health and wellbeing and how much we risk losing by destroying it The all inclusive approach provides a comprehensive and complete coverage of the role of nature in public health making this textbook invaluable reading for health professionals students and researchers within public health environmental health and complementary medicine

Landscape Economy Maria Beatrice Andreucci, Didier Vancutsem, Meryem Atik, Marco Delli Paoli, Beata Dreksler, Dirk Funck, Juan Jose Galan Vivas, Karolina A. Krośnicka, Giulia Marredda, Claire Pelgrims, Gabriela Rembarz, Magdalena Rembeza, Stefanie Schur, Dorota Wojtowicz-Jankowska, Veli Ortacesme, Anna Szilágyi-Nagy, Roxana Maria Triboi, Elif Parlak, Jeroen de Vries, Shashank Yadav, Emrah Yildirim, Katarzyna Zielonko-Jung, 2025 This book presents an approach to integrating a landscape economy dimension into higher education It is addressed in particular to teachers motivated to develop knowledge and competences for sustainable development and social economic transformation Landscape economy is not restricted to any specific discipline We all live and work in and with landscapes and we do that through an economic system However we think that this book is of particular interest for educators in the fields of spatial planning urban planning architecture landscape architecture economics business administration real estate mobility agriculture geography and regional development

Emerging Approaches in Design and New Connections With Nature Özdamar, Esen Gökçe, Tandoğan, Okşan, 2021-12-03 In today's changing and

transforming socio economic political cultural and technological paradigms we encounter many methodologies approaches proposals and practices in reconsidering the disappearing or emerging relations in the human nonhuman environment nature interaction These approaches proposals and practices range from new methods of urban gardening to biophilic design and augmented immersive environments However these human centric approaches which only aim to meet their needs or emerge as technology oriented replicas and representations of nature lead to a departure from a holistic approach to the natural and artificial environment Therefore how can new and emerging approaches or methodologies draw a holistic framework for environmental health sustainability wellness and co existence between environments for all living beings Emerging Approaches in Design and New Connections With Nature covers a variety of topics related to the intersection between nature environment and ways of living and provides a comprehensive guide to biophilic design and the idea of design and nature including benefits theories and effects Covering topics such as biophilic design and sustainability soundscapes and landscapes and urban environments and design it is ideal for architects designers urban planners landscape designers policymakers engineers interior designers practitioners students academicians and researchers

The Case for Cities
Vikas Mehta,Danilo Palazzo,Conrad Kickert,Christopher Auffrey,Terry Grundy,2024-07-31 The fateful year 2020 brought dramatic challenges to American cities The COVID 19 pandemic and the civil unrest caused by the killing of George Floyd led to a cascade of negative media stories about cities often politically motivated It seemed possible that the economic and demographic gains cities had achieved over the last few decades could be lost In fact there has been measurable population loss in larger cities caused by changing work life patterns and changing public perceptions about the costs and benefits of urban living Faced with these challenges advocates for cities must make a vigorous case for cities and show how they aren't the cause of America's social environmental economic and public health problems but in fact are the places where the solutions to those problems will be found The 38 chapters in The Case for Cities draw on the expertise of contributors from the academic professional and civic sectors to explore the creative tension between the two great values on which the vigor of cities depends that they should be Cities of Choice places where people who have choice want to live and Cities of Justice places that welcome and support people with limited choices The book's underlying perspective is that these two values are symbiotic and that promoting both is what leads to viable sustainable urban resurgence This book will be of keen interest to students and practitioners in urban planning urban design real estate architecture and landscape architecture and to urban advocates and civic leaders

Urban Agriculture in Public Space Beata Sirowy,Deni Ruggeri,2024-04-23 This open access book discusses urban agriculture initiatives integrated in public space of dense inner city neighbourhoods thereby ensuring its accessibility for large and diverse segments of urban populations It specifically focuses on the potential impacts of urban agriculture on human well being both on individual and community levels and how planning design policy and management practices can maximize these impacts The book addresses urban agriculture on both a micro and macro scale to facilitate a

transition to more sustainable lifestyles and enhance the quality of urban life It also discusses ways to permanently integrate urban agriculture in existing and planned public spaces in a visually attractive socially inclusive and democratic manner to claim and reclaim the right to the city Based on the research outcomes of the project Cultivating Public Space urban agriculture as a basis for human flourishing and sustainability transition in Norwegian cities funded by the Research Council of Norway the book emerges from a Norwegian context but extends to include international urban agriculture cases from the Netherlands Denmark the UK and more By including a diversity of voices and cultural perspectives the editors aimed to make this book engaging and relevant to an international audience of researchers policy makers urban designers planners educators community activists residents and public space users of the sustainable compact city of today and the future

Landscape Research V Öner DEMİREL,Ertan DÜZGÜNEŞ,2025-09-23 **Relationality** Arturo Escobar,Michal Osterweil,Kriti Sharma,2024-05-16 This important new book argues that at the root of the contemporary crisis of climate energy food inequality and meaning is a certain core presupposition that structures the ways in which we live think act and design the assumption of dualism or the fundamental separateness of things The authors contend that the key to constructing livable worlds lies in the cultivation of ways of knowing and acting based on a profound awareness of the fundamental interdependence of everything that exists what they refer to as relationality This shift in paradigm is necessary for healing our bodies ecosystems cities and the planet at large The book follows two interwoven threads of argumentation on the one hand it explains and exemplifies the modes of operation and the dire consequences of non relational living on the other it elucidates the nature of relationality and explores how it is embodied in transformative practices in multiple spheres of life The authors provide an instructive account of the philosophical scientific social and political sources of relational theory and action with the aim of illuminating the transition from living within seemingly ineluctable toxic loops of unrelational living based on ontological dualism to living within relational weaves which we might co create with multiple human and nonhuman others *The Nordic Model and Physical Culture* Mikkel Tin,Frode Telseth,Jan Ove Tangen,Richard Giulianotti,2019-11-26 This book examines the relationships between the Nordic social democratic welfare system The Nordic Model and physical culture across the domains of sport education and public space Presenting important new empirical research it helps us to understand how the paradoxical blend of social democracy and liberalism in the Nordic countries influences physical culture which in turn contributes to a quality of life that ranks highest in the world Drawing on perspectives from sociology cultural studies history education political science outdoor studies and urban studies the book explores topics such as dance education for sport students doping in cross country skiing outdoor education the active body and the ideology of public parks It includes research material from across the region including Norway Sweden Iceland Finland and Denmark This is fascinating reading for anyone with an interest in physical culture sport studies leisure studies or outdoor studies as well as sociologists or political scientists with an interest in Nordic politics culture and society **Blue Biophilic Cities** Timothy

Beatley,2017-11-30 There is a growing recognition of the contact we need with nature to be happy healthy and to lead meaningful lives We need that nature daily if not hourly and so it must be nearby to where we live and work This is central to the concept of biophilic cities which is emerging as a global movement and guiding framework for city design and planning Blue Biophilic Cities is about the promise of this movement and a kind of biophilic urbanism that is possible for cities perched on the edge of harbours and seas In blue biophilic cities much of the nearby nature is to be found in the marine realm This book explores the efforts underway in a number of cities to foster new marine connections through a variety of innovative programs and initiatives It also discusses a number of design ideas from dynamic shoreline edges and floodable parks to living breakwaters in order to emphasise the possibility of designing for resilience while also supporting marine biodiversity and strengthening biophilic connections to the marine world

[Biophilic Cities for an Urban Century](#) Robert McDonald, Timothy Beatley, 2020-09-25 This book argues that paradoxically at their moment of triumph and fastest growth cities need nature more than ever Only if our urban world is full of biophilic cities will the coming urban century truly succeed Cities are quintessentially human the perfect forum for interaction and we are entering what could justly be called the urban century the fastest period of urban growth in human history Yet a growing body of scientific literature shows that the constant interaction the hyper connectedness of cities leads to an urban psychological penalty Nature in cities can be solution to this dilemma allowing us to have all the benefits of our urban connected world yet also have that urban home be a place where humanity can thrive This book presents best practices and case studies from biophilic design showing how cities around the world are beginning to incorporate nature into their urban fabric It will be a valuable resource for scholars and professionals working in the area of

sustainable cities The Routledge Companion to the Philosophy of Architectural Reconstruction Zoltán Somhegyi, Lisa Giombini, 2024-05-30 This companion investigates the philosophical and theoretical foundations determining the conditions of possibility and the limits that make the conservation readaptation and transformation of past buildings legitimate operations As increasing ecological and economic challenges question opportunities for new construction the process of restoring transforming and readapting buildings for new or continued use is becoming an essential part of architectural practice At the same time the role of building conservation is changing from mere material preservation to being part of a broader strategy for social regeneration eco awareness and inclusive urban planning Chapters of this volume explore the complex set of considerations that inform decisions to merely preserve accurately restore or variously reuse a building They also look at the broader philosophical concerns such as ethical and aesthetic values combined with ideas of heritage history and collective identity Case studies on reconstruction after war gentrification the restoration of ancient edifices reconstruction following the effects of climate change and the use of technology solutions among many others make this a timely and urgent volume Adopting a broad transcultural perspective with contributions from five continents the volume combines theoretical approaches with more practical case study based investigations and will be of great interest to upper level students and academics working in the fields of architecture conservation urban design aesthetics and heritage management

Landscape Urbanism and Green Infrastructure Thomas Panagopoulos, 2019-08-19 This volume examines the applicability of landscape urbanism theory in contemporary landscape architecture practice by bringing together ecology and architecture in the built environment Using participatory planning of green infrastructure and application of nature based solutions to address urban challenges landscape urbanism seeks to reintroduce critical connections between natural and urban systems In light of ongoing developments in landscape architecture the goal is a paradigm shift towards a landscape that restores and rehabilitates urban ecosystems Nine contributions examine a wide range of successful cases of designing livable and resilient cities in different geographical contexts from the United States of America to Australia and Japan and through several European cities in Italy Portugal Estonia and Greece While some chapters attempt to conceptualize the interconnections between cities and nature others clearly have an empirical focus Efforts such as the use of ornamental helophyte plants in bioretention ponds to reduce and treat stormwater runoff the recovery of a poorly constructed urban waterway or participatory approaches for optimizing the location of green stormwater infrastructure and examining the environmental justice issue of equitable availability and accessibility to public open spaces make these innovations explicit Thus this volume contributes to the sustainable cities goal of the United Nations **Redesigning the Unremarkable** Evonne Miller, Debra Flanders Cushing, 2023-05-25 Redesigning the Unremarkable is a timely and necessary reminder that the often neglected elements and spaces of our built environment from trash bins seats stairways and fences to streets bikeways underpasses parking lots and shopping centres must be thoughtfully redesigned to enhance human and planetary health Using the lens of

sustainable salutogenic and playable design in this inspiring book Miller and Cushing explore the challenges opportunities and importance of redesigning the unremarkable Drawing on global research theory practical case studies photographs and personal experiences Redesigning the Unremarkable is a vital text a doer s guide for researchers policymakers and practitioners wanting to transform and positively reimagine our urban environment
